

Describe Image

100 Practice Images with Sample Answers

A focused visual practice workbook for building clear, well-organized spoken descriptions.

100 original charts, diagrams, maps, and data visuals
Model responses | Practice and self-review pages

TypoGrammar.com

Independent practice material. Not affiliated with or endorsed by Pearson PLC.

How to Use This Workbook

This workbook contains 100 original visual prompts and model responses. Use the image first without reading the sample answer. Give yourself a short planning moment, describe the main subject, identify the most important values or stages, and finish with an overall comparison or trend.

A simple response structure

1. Introduce what the visual shows.
2. Report the main pattern, stages, or locations.
3. Compare the highest and lowest points or explain the sequence.
4. End with one overall observation.

Practice routine

Speak for about 30 to 40 seconds, record yourself, then compare your response with the sample. The samples are examples, not scripts to memorize. Use only details visible in the visual, and do not invent causes or conclusions.

Self-check

Did I identify the visual correctly? Did I mention the main feature and at least one useful comparison? Was my answer organized and grammatically clear? Did I avoid unsupported explanations?

The graphics and responses in this workbook are original TypoGrammar practice materials. They are not actual Pearson test questions and do not guarantee a test score.

Model Answers

Compare your description with these sample responses. A strong answer selects the key information and presents it clearly, rather than listing every detail.

Answer 001: Weekly Library Visits

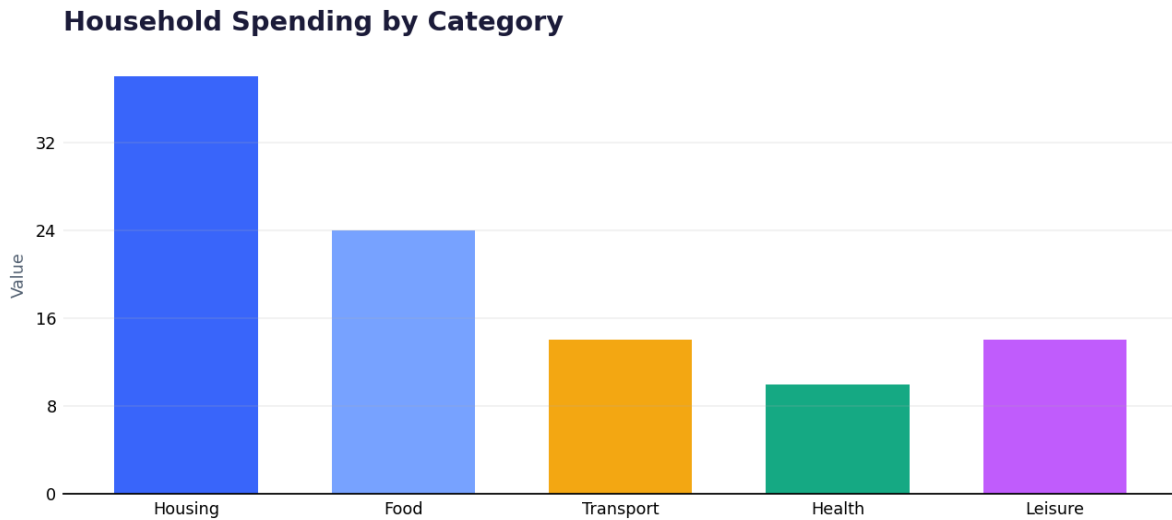

Sample response

The line chart shows library visits during one week. Attendance starts at 120 on Monday, dips slightly on Wednesday, then rises to a peak of 285 on Saturday before falling to 240 on Sunday. Overall, visits increase across the week, with the busiest period at the weekend.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 002: Household Spending by Category

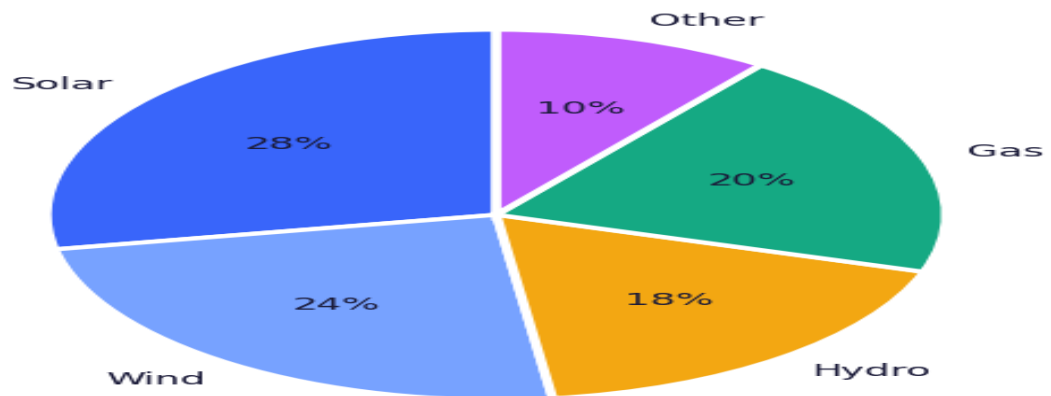

Sample response

The bar chart compares household spending across five categories. Housing is the largest expense at 38 percent, followed by food at 24 percent. Transport and leisure account for 14 percent each, while health is the smallest category at 10 percent. Overall, housing and food make up most spending.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 003: Energy Sources in 2025

Energy Sources in 2025

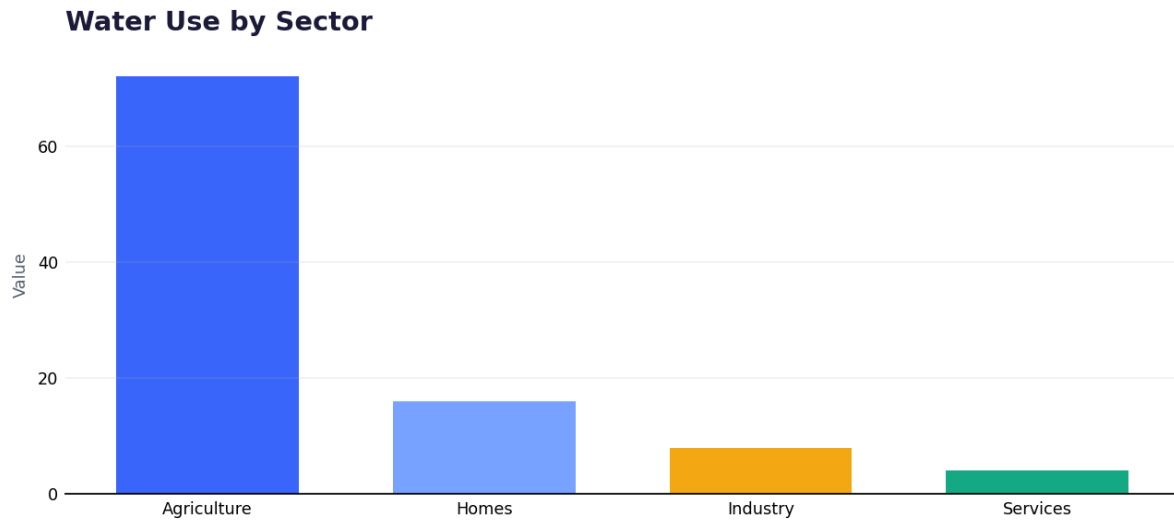

Sample response

The pie chart presents the energy mix in 2025. Solar is the largest source at 28 percent, closely followed by wind at 24 percent. Gas contributes 20 percent and hydro 18 percent, while other sources make up the remaining 10 percent. Renewable sources together represent the majority.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 004: Water Use by Sector

Sample response

The chart compares water use across four sectors. Agriculture dominates at 72 percent, while homes use 16 percent. Industry accounts for 8 percent and services just 4 percent. The main feature is the substantial gap between agriculture and every other sector.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 005: Steps in Recycling Paper

Steps in Recycling Paper

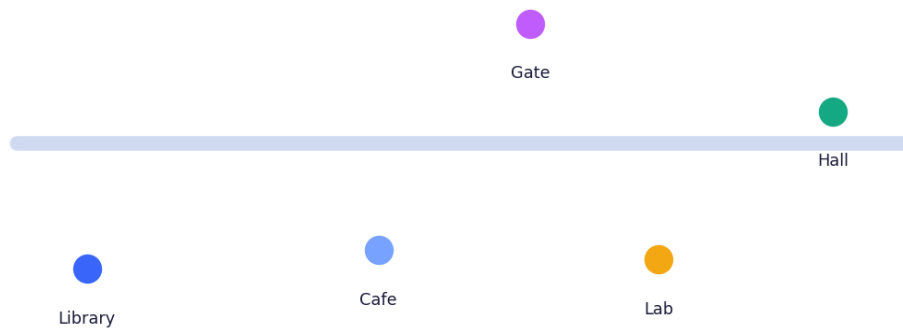

Sample response

The diagram illustrates five stages in paper recycling. Used paper is collected and sorted before it is turned into pulp. The pulp is then pressed into sheets and dried. Overall, the process moves from gathering waste material to producing usable recycled paper.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 006: Campus Map: New Facilities

Campus Map: New Facilities

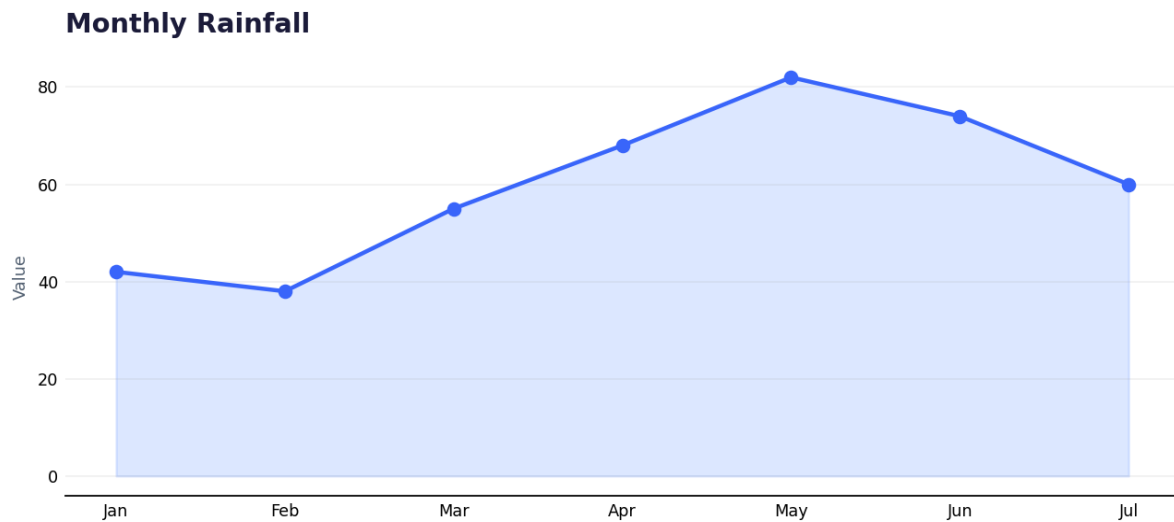

Sample response

The map shows five facilities on a campus. The main hall is positioned furthest north, while the entrance gate is at the southern end. The library and laboratory are in the central area, and the cafe is located to the east. The facilities are arranged around a central walkway.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 007: Monthly Rainfall

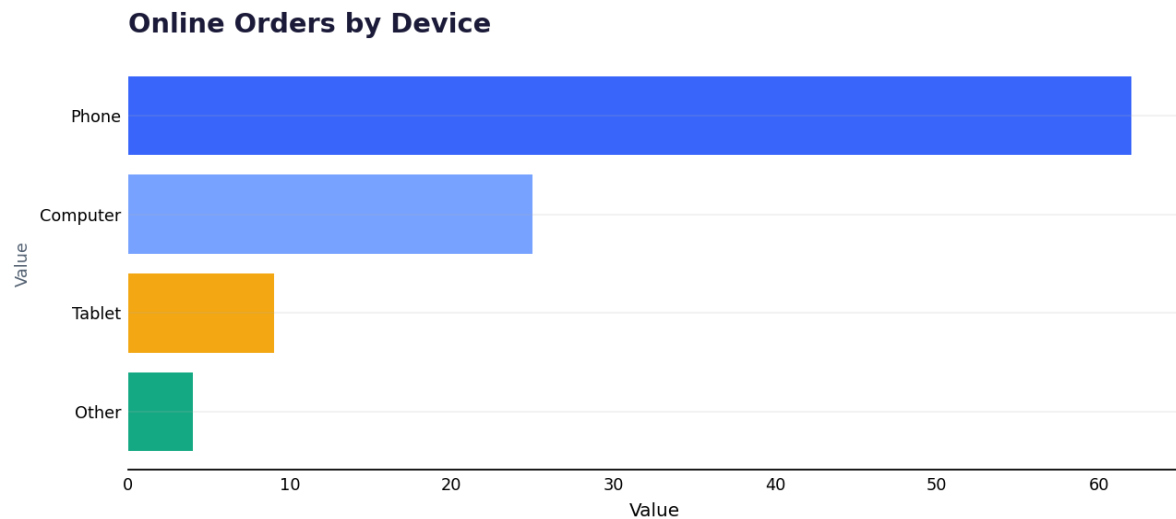

Sample response

The area chart displays monthly rainfall from January to July. Rainfall begins at 42 millimeters and reaches its highest point of 82 in May. It then declines to 60 millimeters by July. Overall, the first half of the period is wetter, despite a small February dip.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 008: Online Orders by Device

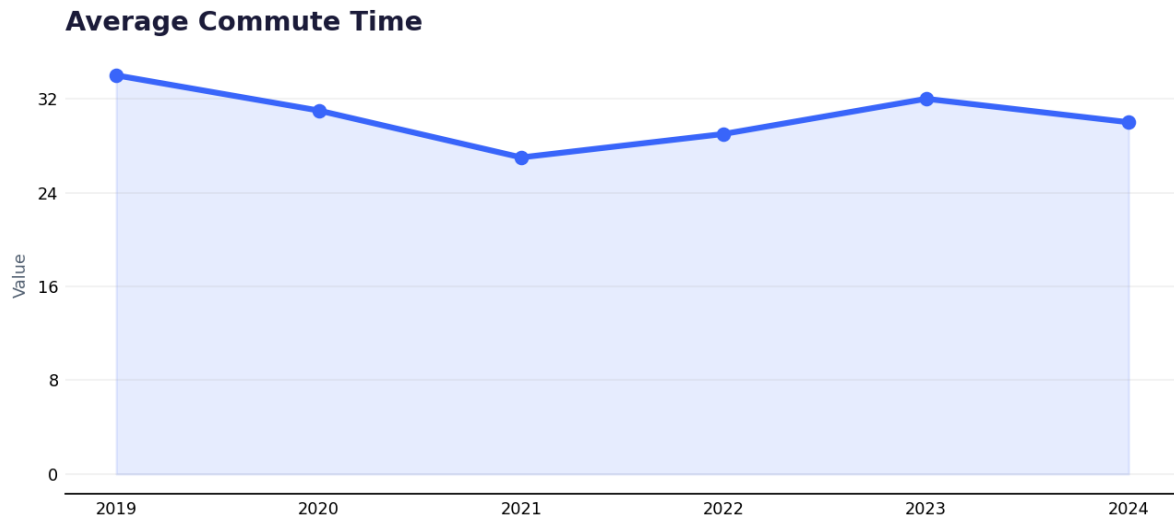

Sample response

The horizontal bar chart compares online orders by device. Phones account for 62 percent, well ahead of computers at 25 percent. Tablets contribute 9 percent and other devices 4 percent. This indicates that mobile phones are the dominant shopping device.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 009: Average Commute Time

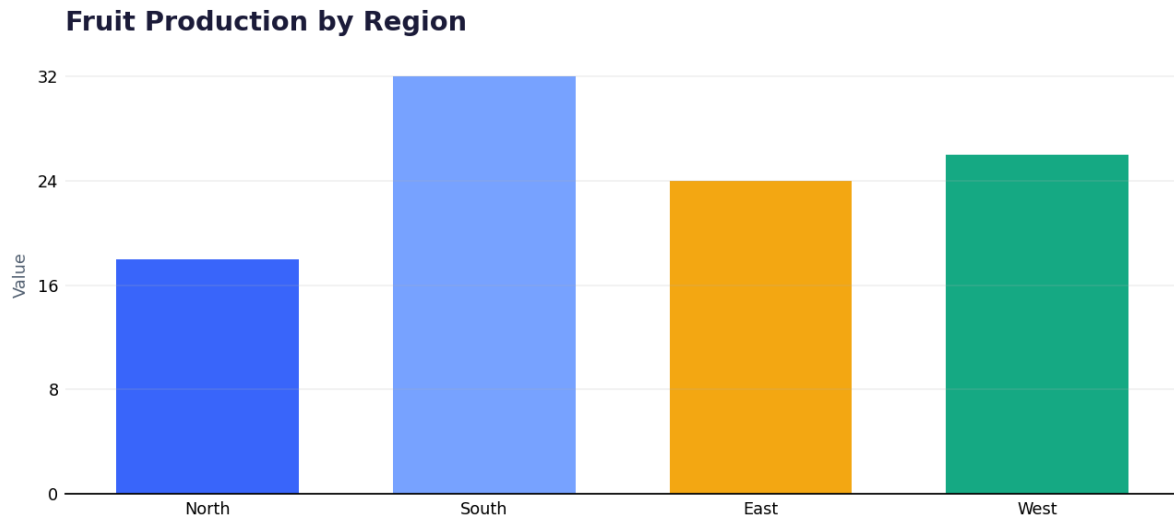

Sample response

The line chart tracks average commute time from 2019 to 2024. It falls from 34 minutes to a low of 27 in 2021, then rises to 32 in 2023 before easing to 30 in 2024. Overall, the commute time ends below its initial level.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 010: Fruit Production by Region

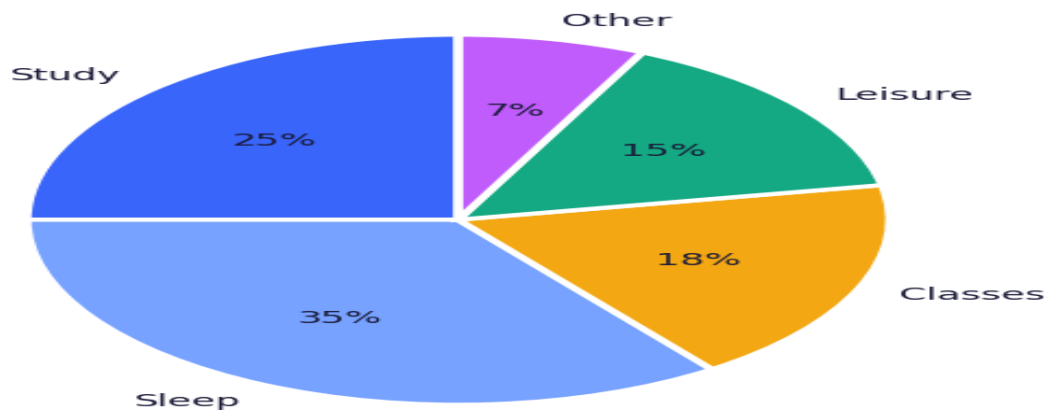

Sample response

The bar chart compares fruit production in four regions. The South produces the most at 32 thousand tonnes, while the North has the lowest output at 18 thousand. The East and West record 24 and 26 thousand tonnes, respectively. Production is therefore highest in the South.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 011: Student Time Use

Student Time Use

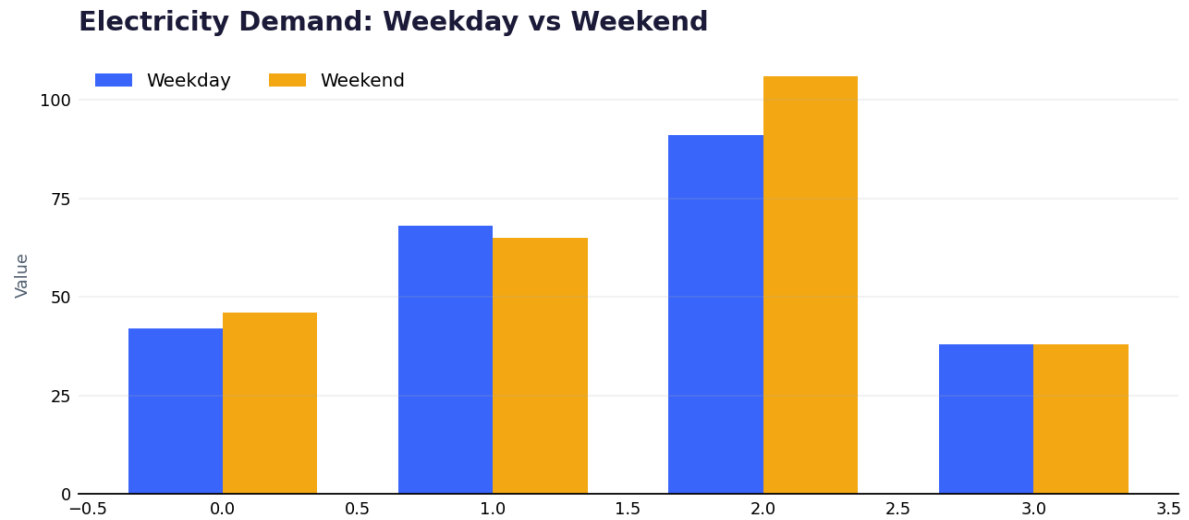

Sample response

The pie chart shows how students allocate their time. Sleep is the largest category at 35 percent, followed by study at 25 percent. Classes account for 18 percent, leisure 15 percent, and other activities 7 percent. Sleep and study together represent 60 percent of the total.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 012: Electricity Demand: Weekday vs Weekend

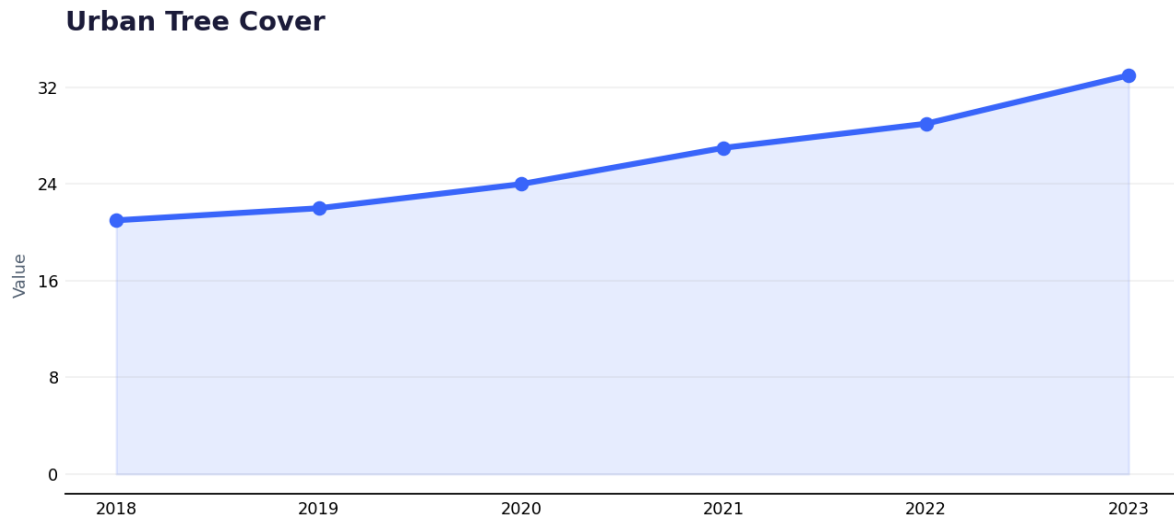

Sample response

The grouped columns compare electricity demand on weekdays and weekends. Weekday use rises from 42 units in the morning to a peak of 91 in the evening, then falls to 38 at night. Weekend demand follows the same broad pattern but is higher in the afternoon and evening.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 013: Urban Tree Cover

Sample response

The line chart shows urban tree cover increasing steadily from 21 percent in 2018 to 33 percent in 2023. The largest yearly gain occurs between 2022 and 2023. Overall, the data indicate consistent expansion of green space.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 014: Stages of Bean Growth

Stages of Bean Growth

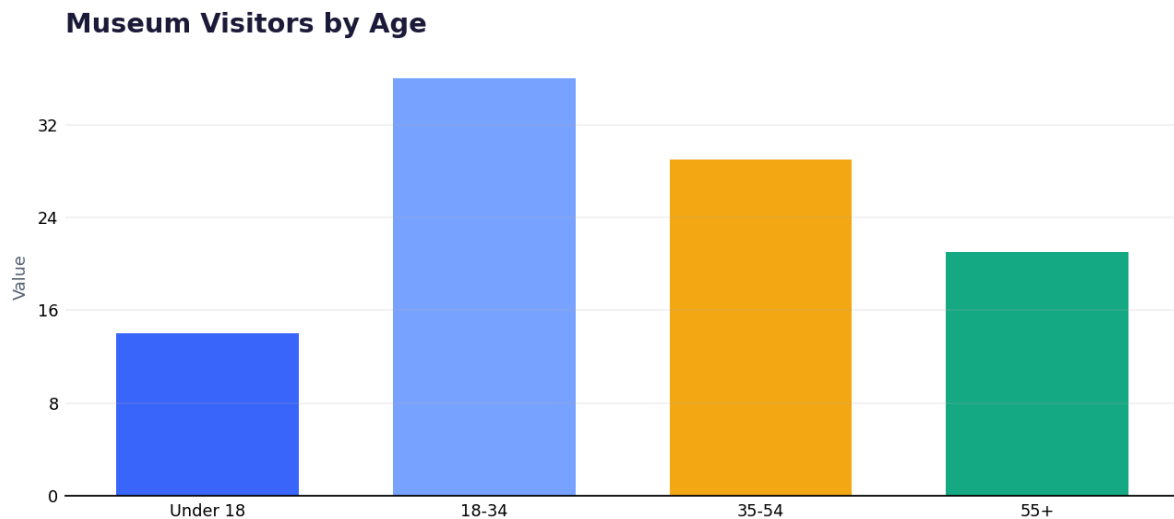

Sample response

The diagram presents five stages of bean plant growth, from seed to pod. A seed first sprouts, develops into a seedling, and later produces a flower. The flower eventually forms a pod. The sequence shows a gradual transition from germination to reproduction.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 015: Museum Visitors by Age

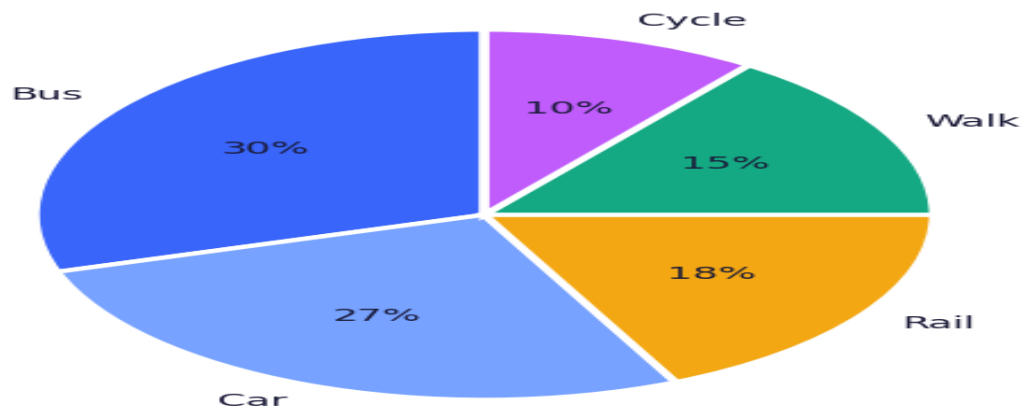

Sample response

The bar chart shows museum visitors by age group. Adults aged 18 to 34 form the largest group at 36 percent, followed by those aged 35 to 54 at 29 percent. Visitors over 55 account for 21 percent, and under-18s make up 14 percent.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 016: City Transport Choices

City Transport Choices

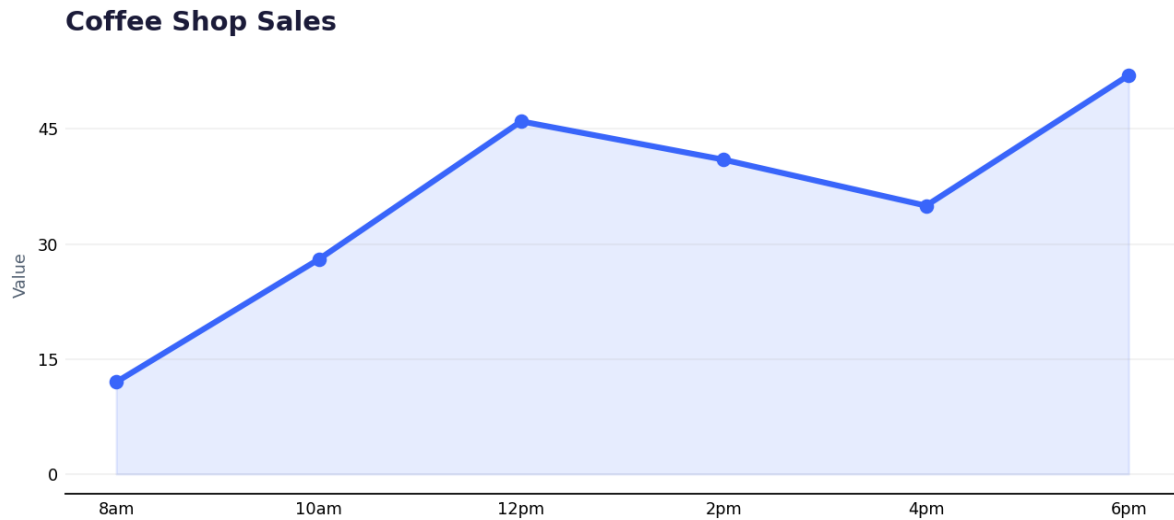

Sample response

The pie chart compares transport choices in a city. Bus use is highest at 30 percent, with cars close behind at 27 percent. Rail accounts for 18 percent, walking 15 percent, and cycling 10 percent. Public transport represents nearly half of all trips.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 017: Coffee Shop Sales

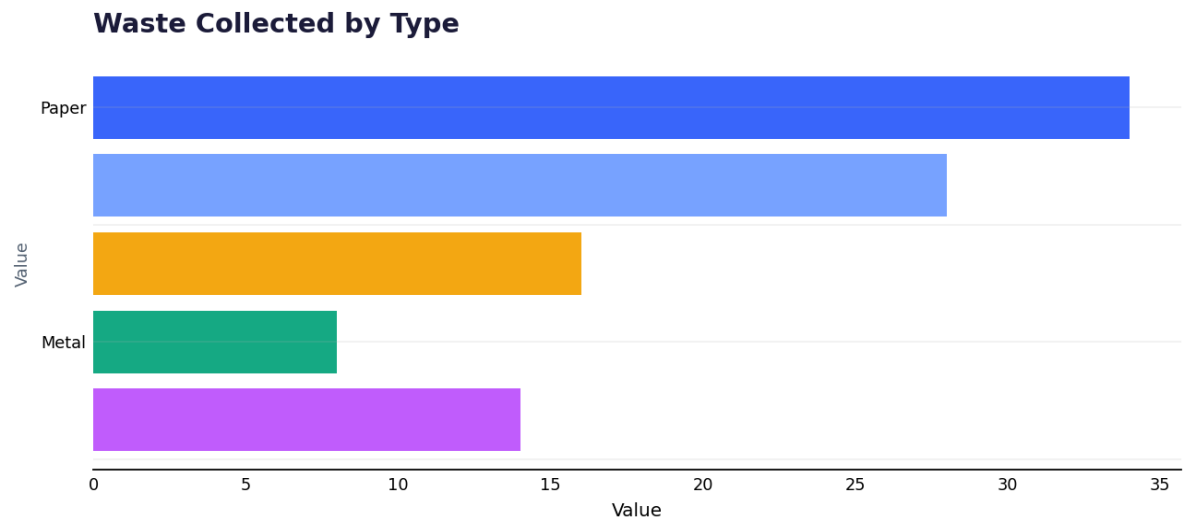

Sample response

The line chart shows coffee shop sales throughout the day. Sales rise from 12 at 8 a.m. to 46 at noon, decline gradually during the afternoon, and reach the daily high of 52 at 6 p.m. The evening period is the busiest.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 018: Waste Collected by Type

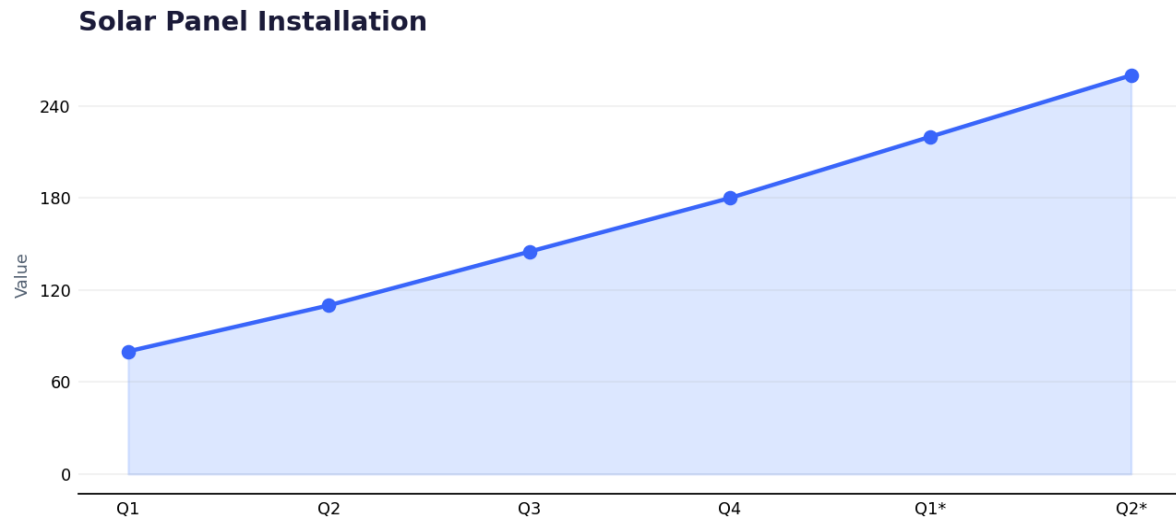

Sample response

The chart compares waste collected by material. Paper is the largest category at 34 tonnes, followed by plastic at 28. Glass accounts for 16 tonnes, food waste 14, and metal is lowest at 8. Paper and plastic together form most of the total.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 019: Solar Panel Installation

Sample response

The area chart shows solar panel installations increasing from 80 in the first quarter to a projected 260 by the second quarter of the following year. Growth is steady, with the steepest rise in the final two intervals. The overall trend is strongly upward.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 020: A Simple Water Cycle

A Simple Water Cycle

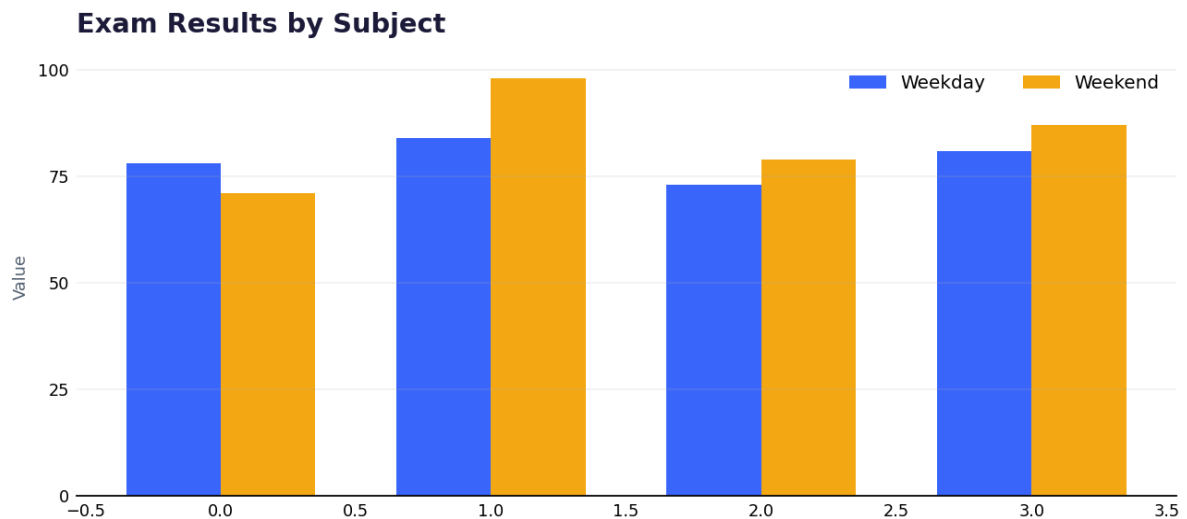

Sample response

The diagram outlines a simplified water cycle. Heat causes water to evaporate, and the vapor cools through condensation to form clouds. Water then falls as rain and collects in rivers or lakes, where the cycle can begin again.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 021: Exam Results by Subject

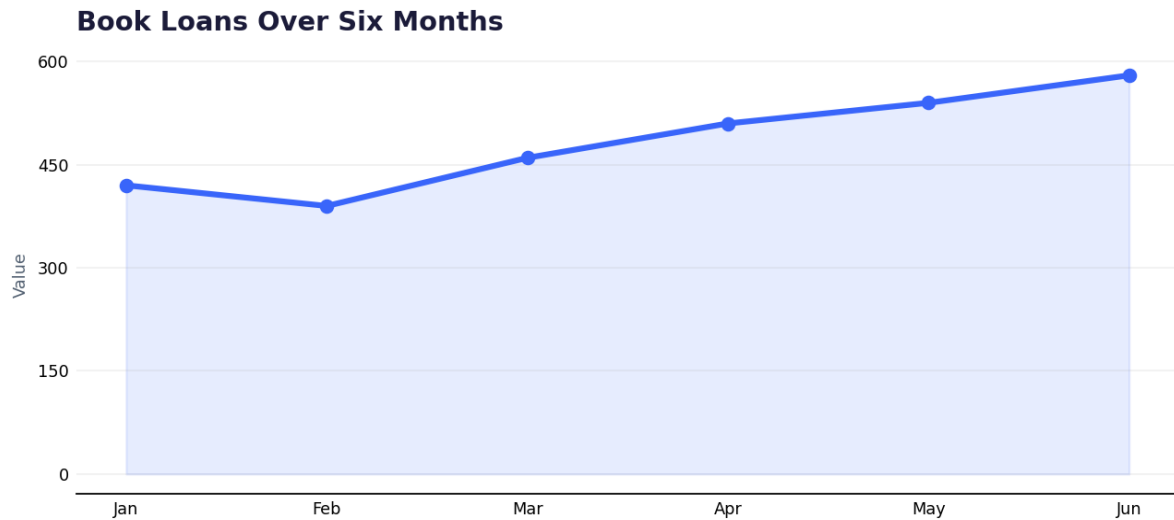

Sample response

The grouped bar chart compares average exam results across four subjects. Science has the highest score at 84, while English is lowest at 73. History reaches 81 and mathematics 78. Scores are relatively close, with an 11-point range.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 022: Book Loans Over Six Months

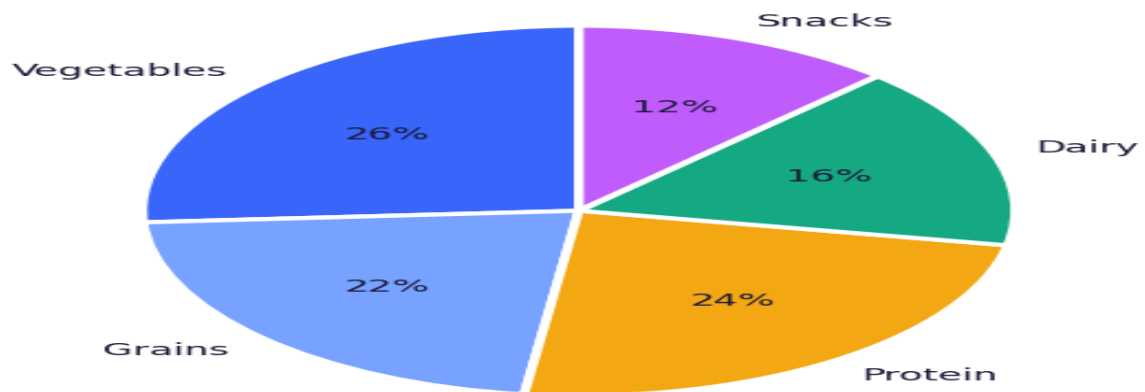

Sample response

The line chart shows monthly book loans. After a fall from 420 in January to 390 in February, borrowing rises steadily and reaches 580 in June. The strongest growth occurs between February and April. Overall, the trend is upward.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 023: Food Budget Allocation

Food Budget Allocation

Sample response

The pie chart displays a household food budget. Vegetables receive the largest share at 26 percent, followed by protein at 24 percent and grains at 22 percent. Dairy accounts for 16 percent and snacks 12 percent. The three leading categories represent 72 percent.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 024: Factory Production Line

Factory Production Line

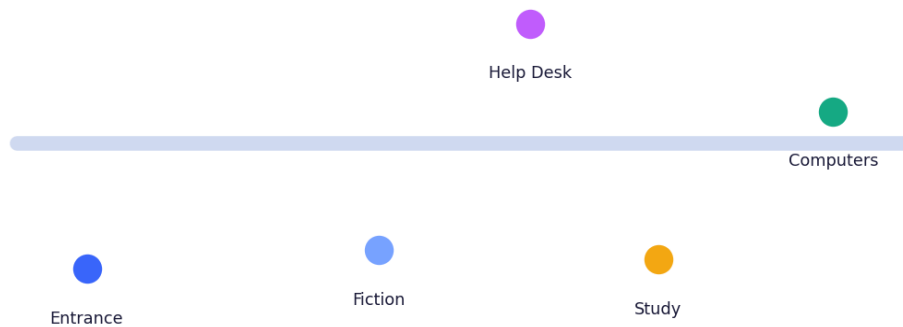

Sample response

The process diagram shows five stages in factory production. Raw materials are cut to size, assembled into products, and tested for quality before packing. Testing occurs before the final packaging stage, helping ensure that only checked products are shipped.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 025: Library Floor Plan

Library Floor Plan

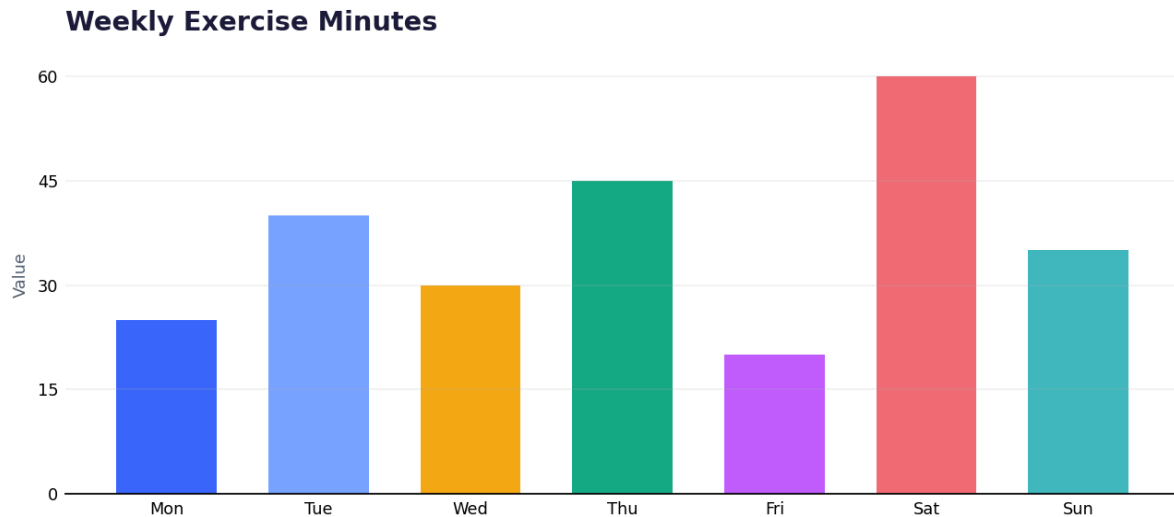

Sample response

The floor plan places the entrance at the southern side and the help desk near the center. Fiction shelves occupy the western section, while computers are in the east. A study area sits toward the north. The help desk is accessible from the main entrance.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 026: Weekly Exercise Minutes

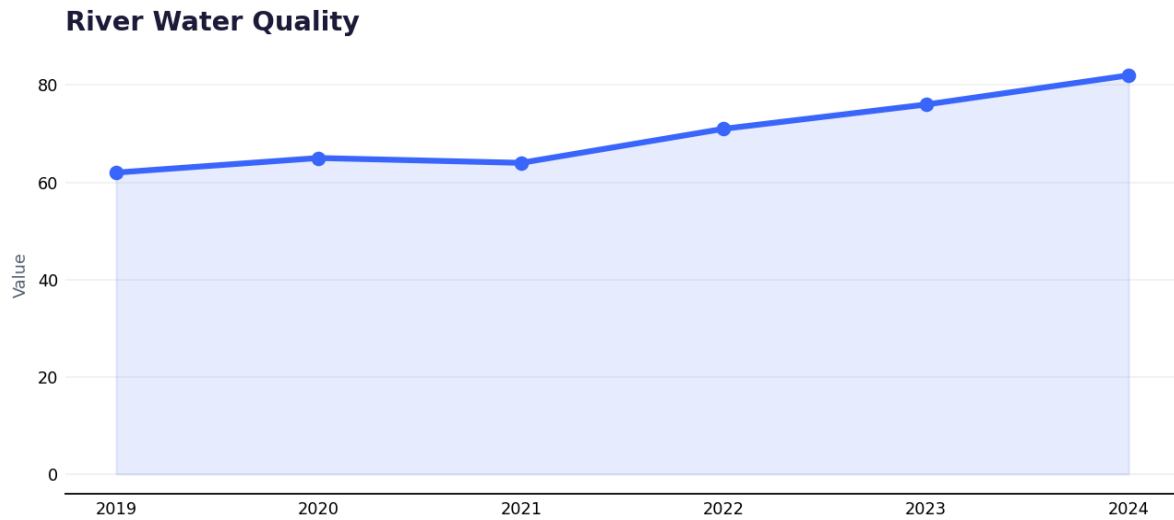

Sample response

The bar chart compares exercise time across the week. Saturday has the highest value at 60 minutes, while Friday is lowest at 20. Thursday reaches 45 minutes and Tuesday 40. Exercise varies from day to day but is generally greater on the weekend.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 027: River Water Quality

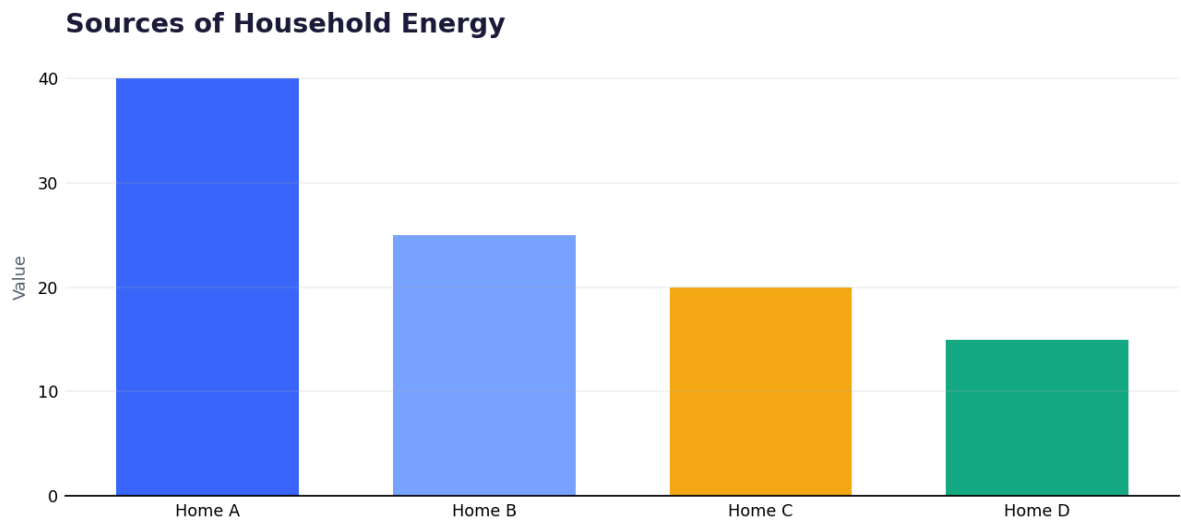

Sample response

The line chart indicates a general improvement in river water quality from 62 points in 2019 to 82 in 2024. There is a minor decline in 2021, followed by consistent gains. The highest quality score occurs in the final year.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 028: Sources of Household Energy

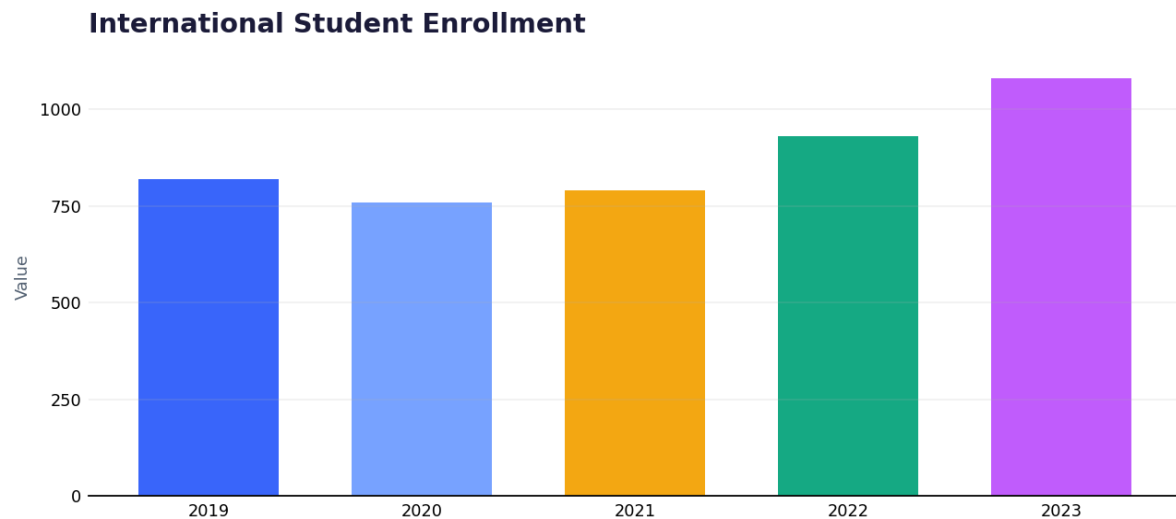

Sample response

The stacked chart compares household energy sources across four homes. In each case, the largest segment is electricity, while solar contributes a smaller share. Home A has the greatest total consumption and Home D the least. The mix varies, but electricity remains dominant.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 029: International Student Enrollment

Sample response

The bar chart presents international student enrollment over five years. Numbers fall from 820 in 2019 to 760 in 2020, then recover to 790 in 2021. Enrollment rises sharply afterward, reaching 1,080 in 2023, the period high.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 030: How a Package Is Delivered

How a Package Is Delivered

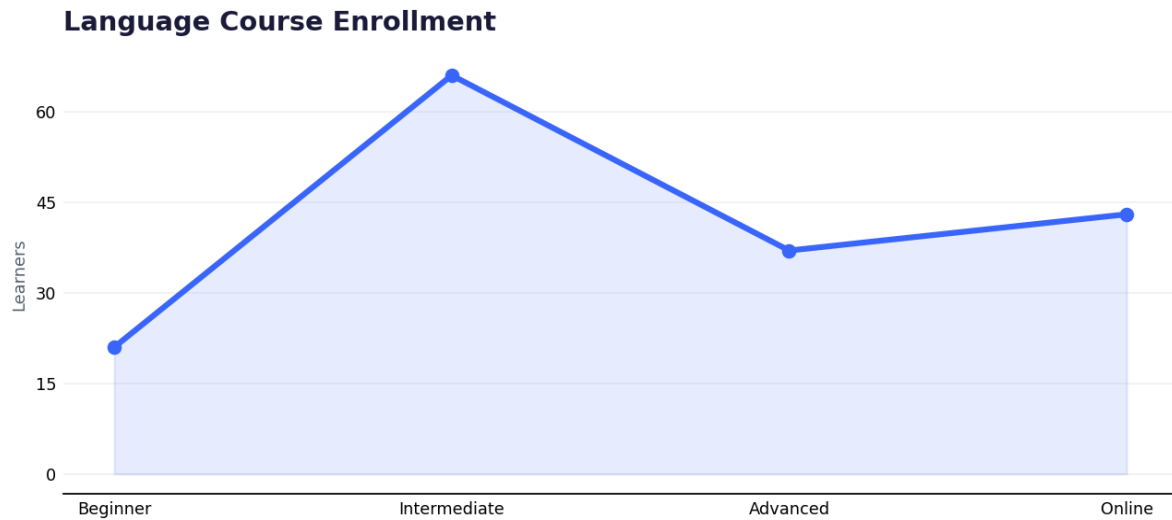

Sample response

The diagram illustrates package delivery. An order is processed at a warehouse, where the parcel is sorted. It is then transported to the destination area and delivered to the customer. Sorting occurs between warehouse handling and transport.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 031: Language Course Enrollment

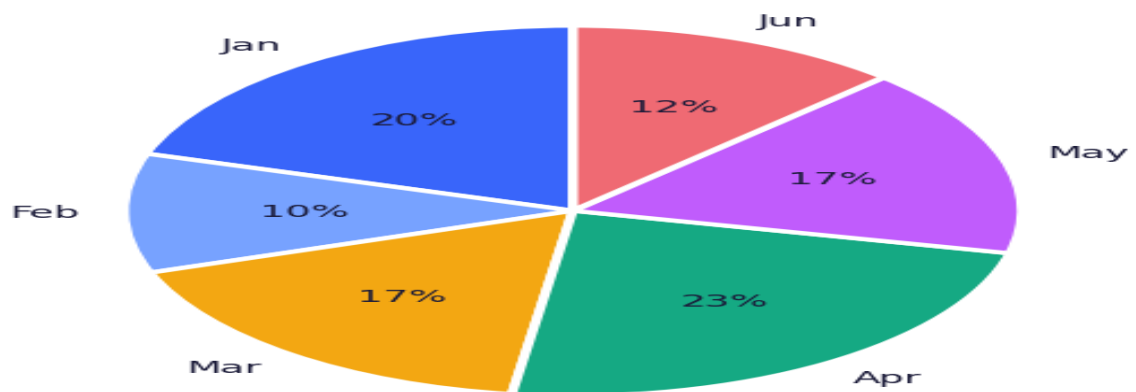

Sample response

The line chart presents language course enrollment across 4 categories. The highest figure is 66 for Intermediate, while Beginner records the lowest value at 21. The values vary across the categories, with intermediate clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 032: Mobile App Growth

Mobile App Growth

Sample response

The pie chart compares mobile app growth. Apr has the largest share at 27 percent, whereas Feb is the smallest at 12 percent. The other categories fall between these values. Overall, the distribution is led by apr.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 033: Air Quality Index

Air Quality Index

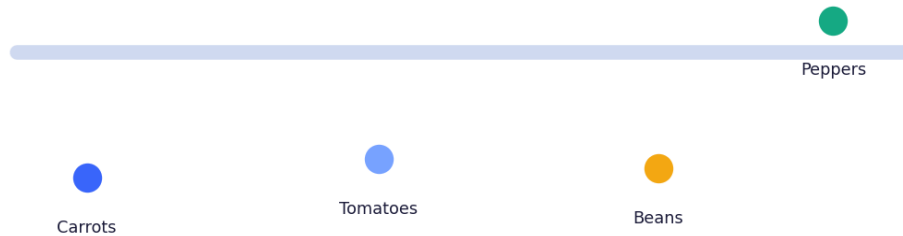

Sample response

The diagram shows 4 stages in air quality index. It begins with north and proceeds through south, east, before ending with west. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 034: Vegetable Harvest

Vegetable Harvest

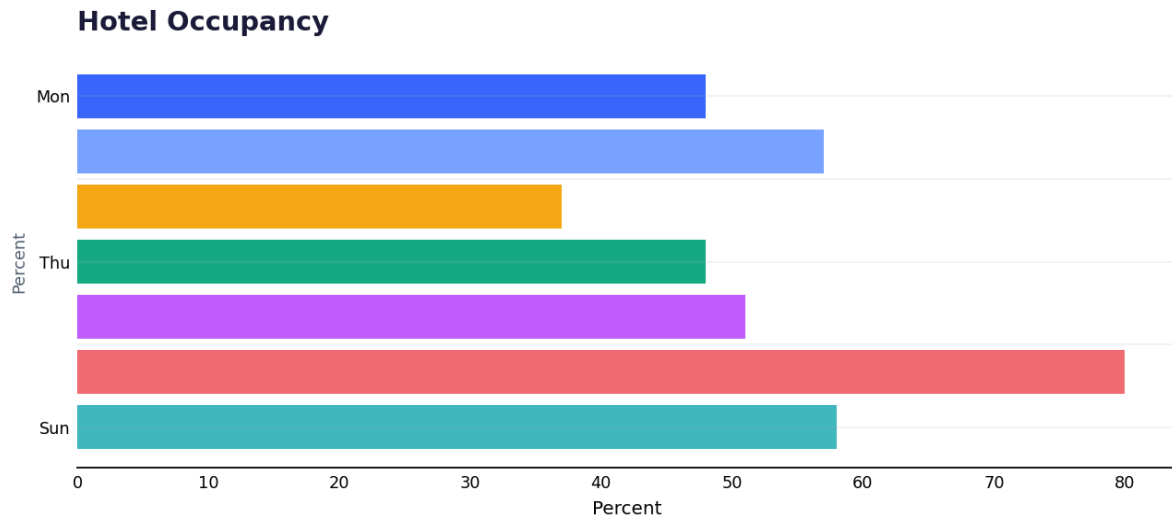

Sample response

The map presents the locations of 4 places in vegetable harvest. Carrots is in the main access area, while Peppers is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 035: Hotel Occupancy

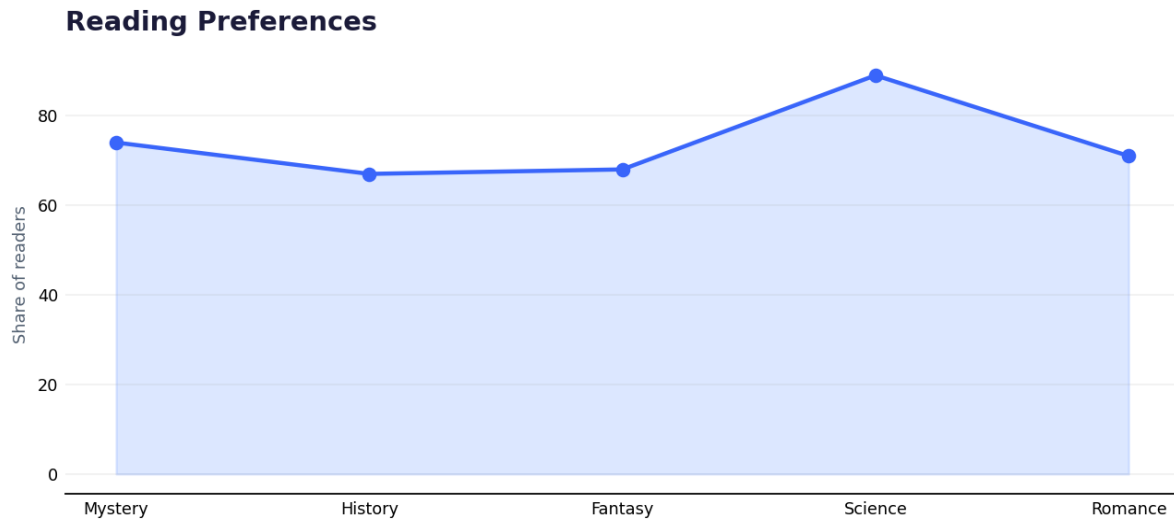

Sample response

The bar chart presents hotel occupancy across 7 categories. The highest figure is 80 for Sat, while Wed records the lowest value at 37. The values vary across the categories, with sat clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 036: Reading Preferences

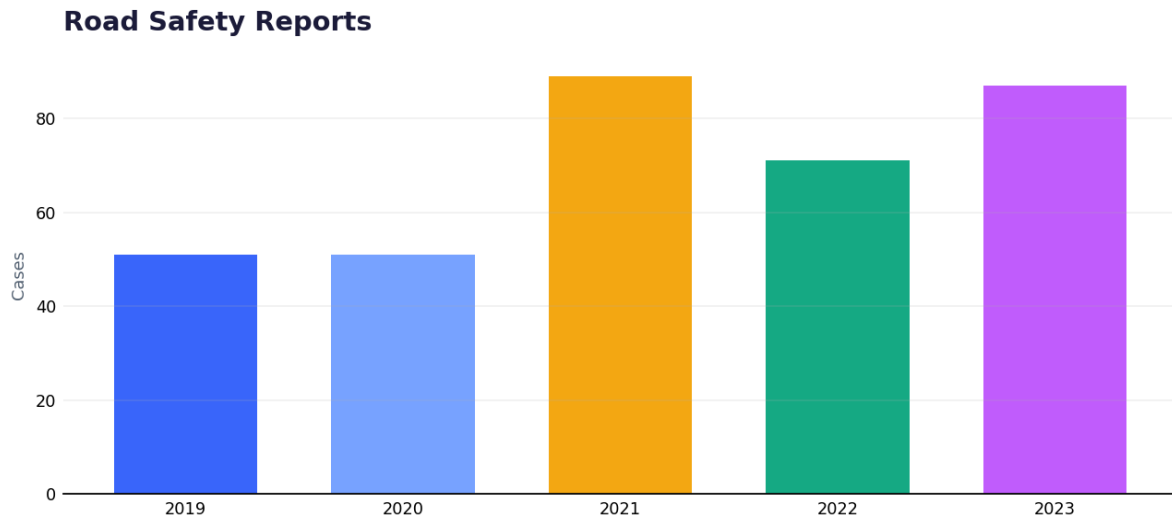

Sample response

The bar chart presents reading preferences across 5 categories. The highest figure is 89 for Science, while History records the lowest value at 67. The values vary across the categories, with science clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 037: Road Safety Reports

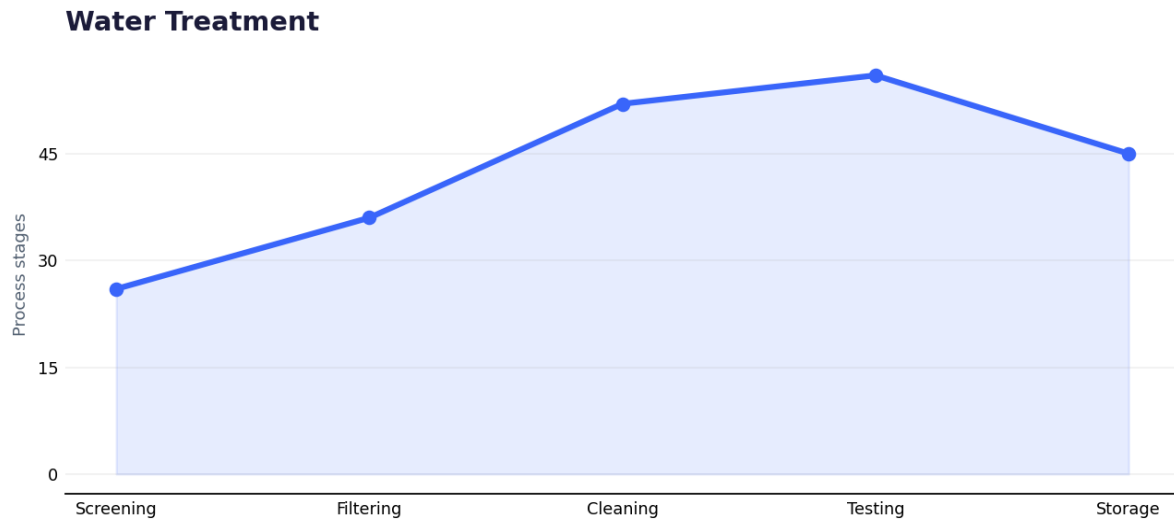

Sample response

The bar chart presents road safety reports across 5 categories. The highest figure is 89 for 2021, while 2019 records the lowest value at 51. The values vary across the categories, with 2021 clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 038: Water Treatment

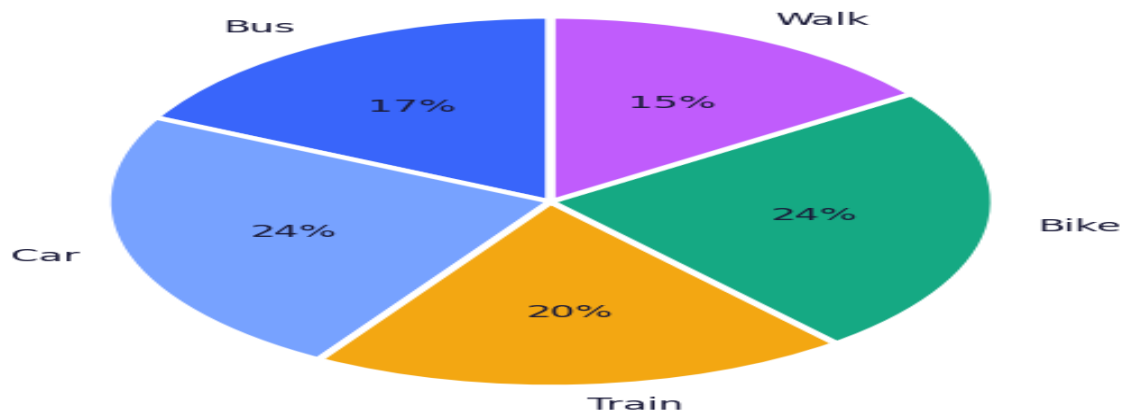

Sample response

The line chart presents water treatment across 5 categories. The highest figure is 56 for Testing, while Screening records the lowest value at 26. The values vary across the categories, with testing clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 039: Workplace Commute

Workplace Commute

Sample response

The pie chart compares workplace commute. Car has the largest share at 30 percent, whereas Walk is the smallest at 15 percent. The other categories fall between these values. Overall, the distribution is led by car.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 040: Museum Funding

Museum Funding

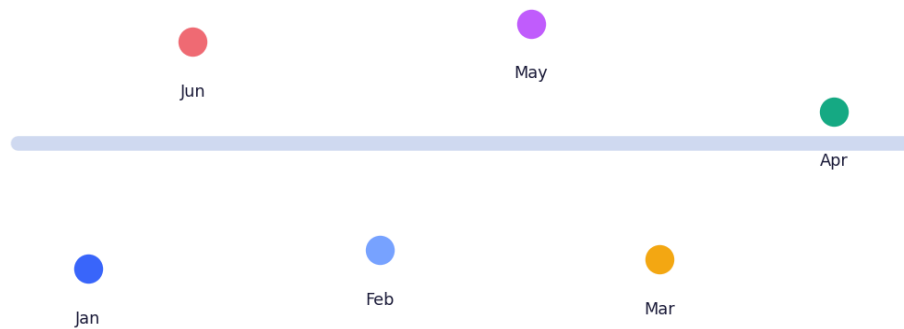

Sample response

The diagram shows 5 stages in museum funding. It begins with exhibits and proceeds through staff, events, repairs, before ending with outreach. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 041: Temperature by Month

Temperature by Month

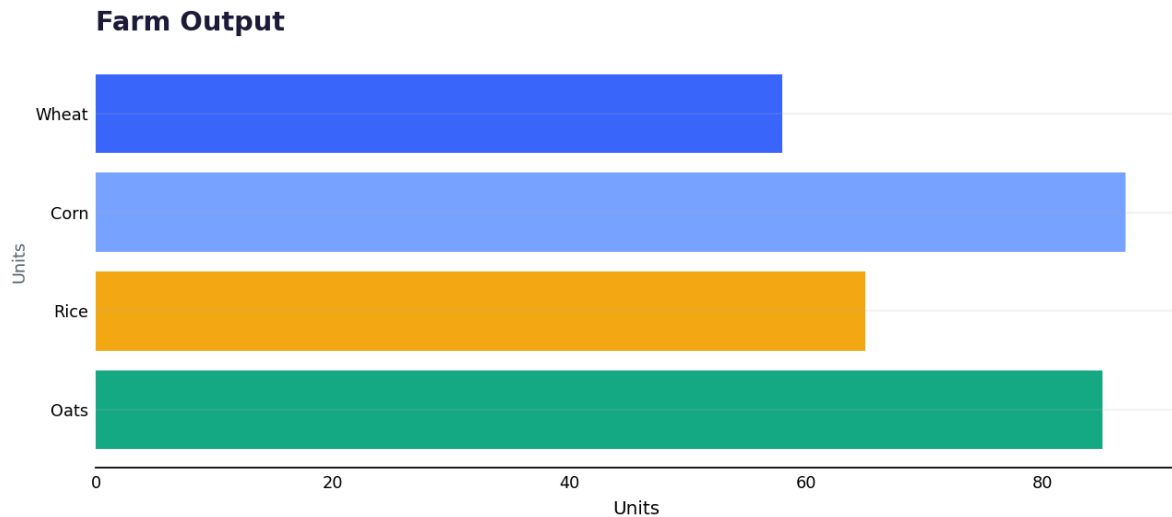

Sample response

The map presents the locations of 6 places in temperature by month. Jan is in the main access area, while Jun is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 042: Farm Output

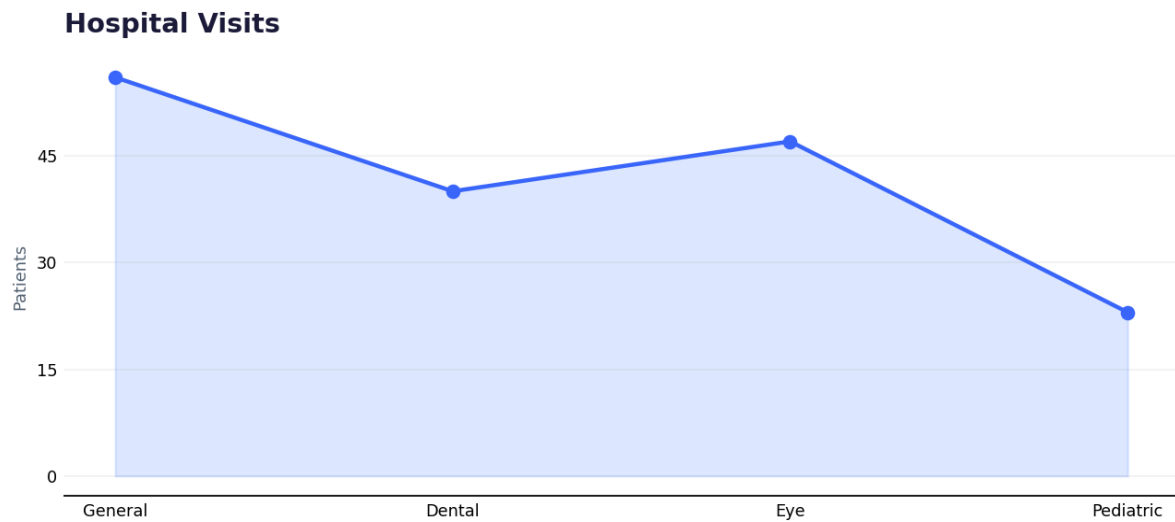

Sample response

The bar chart presents farm output across 4 categories. The highest figure is 87 for Corn, while Wheat records the lowest value at 58. The values vary across the categories, with corn clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 043: Hospital Visits

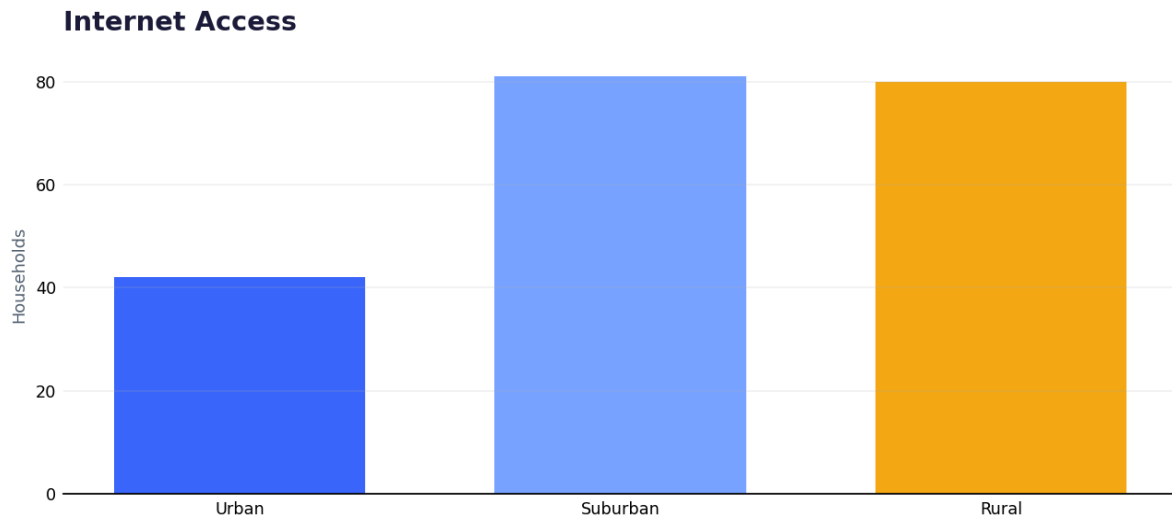

Sample response

The bar chart presents hospital visits across 4 categories. The highest figure is 56 for General, while Pediatric records the lowest value at 23. The values vary across the categories, with general clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 044: Internet Access

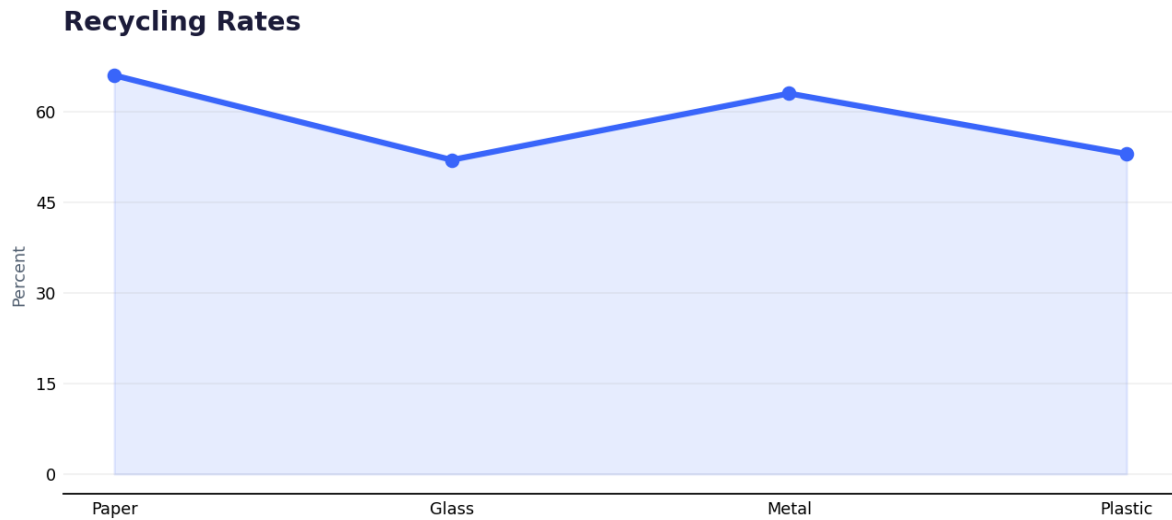

Sample response

The bar chart presents internet access across 3 categories. The highest figure is 81 for Suburban, while Urban records the lowest value at 42. The values vary across the categories, with suburban clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 045: Recycling Rates

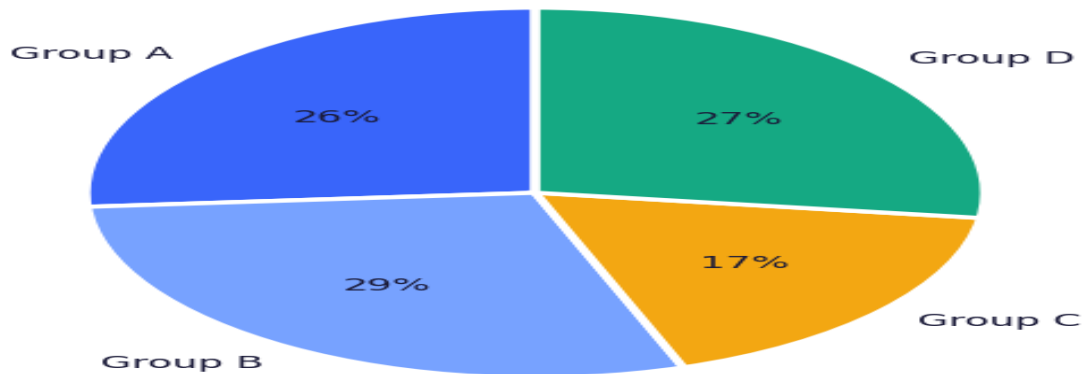

Sample response

The line chart presents recycling rates across 4 categories. The highest figure is 66 for Paper, while Glass records the lowest value at 52. The values vary across the categories, with paper clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 046: Study Hours and Scores

Study Hours and Scores

Sample response

The pie chart compares study hours and scores. Group B has the largest share at 30 percent, whereas Group C is the smallest at 18 percent. The other categories fall between these values. Overall, the distribution is led by group b.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 047: Delivery Times

Delivery Times

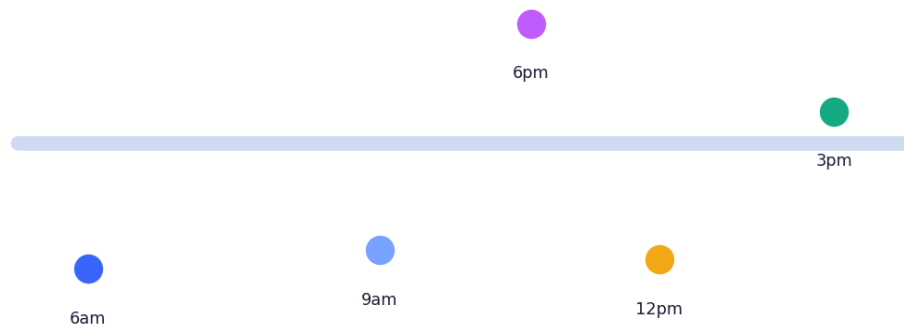

Sample response

The diagram shows 4 stages in delivery times. It begins with local and proceeds through regional, national, before ending with express. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 048: Daily Bakery Sales

Daily Bakery Sales

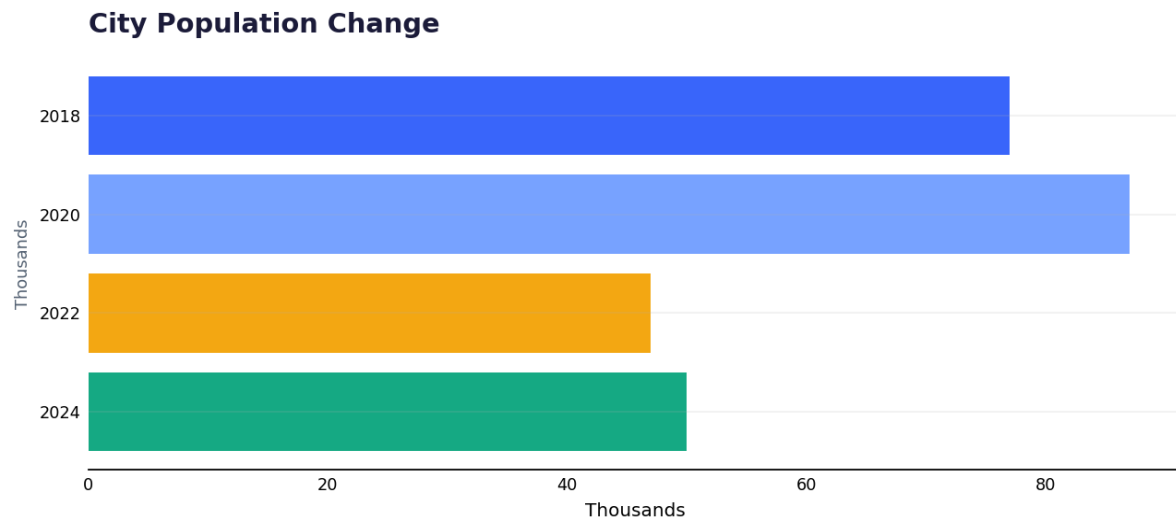

Sample response

The map presents the locations of 5 places in daily bakery sales. 6am is in the main access area, while 6pm is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 049: City Population Change

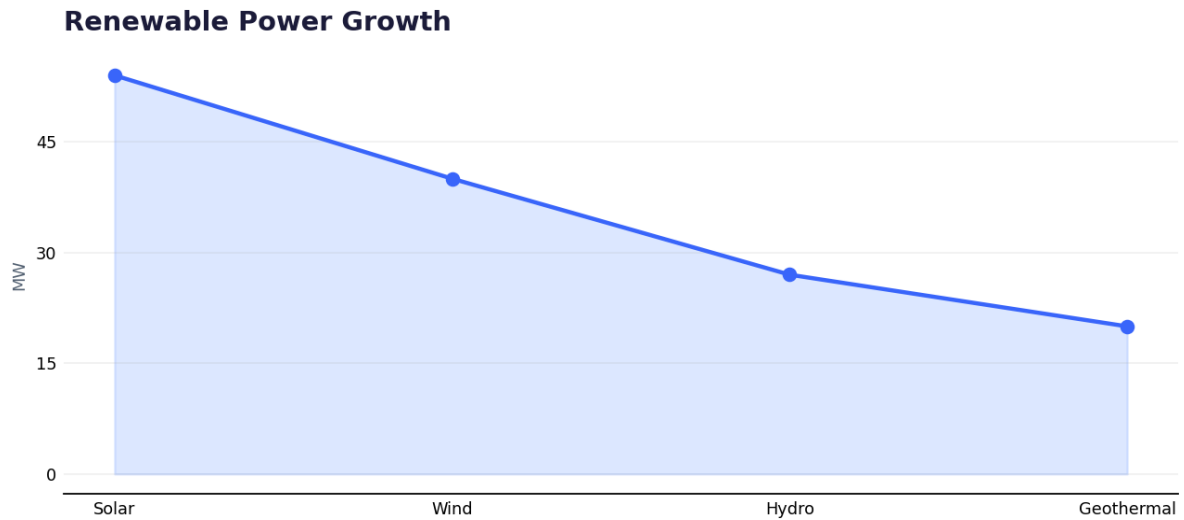

Sample response

The bar chart presents city population change across 4 categories. The highest figure is 87 for 2020, while 2022 records the lowest value at 47. The values vary across the categories, with 2020 clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 050: Renewable Power Growth

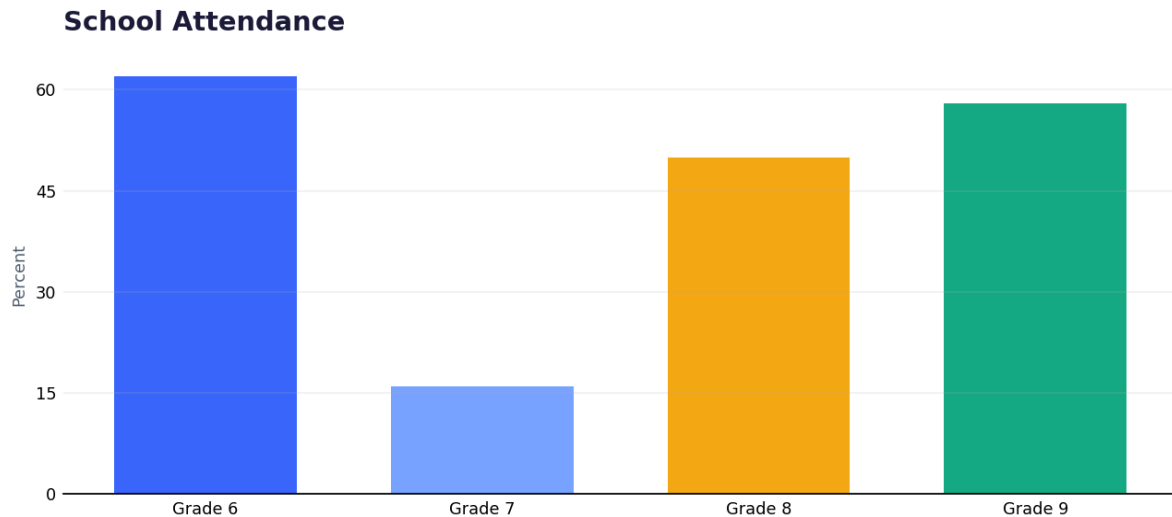

Sample response

The bar chart presents renewable power growth across 4 categories. The highest figure is 54 for Solar, while Geothermal records the lowest value at 20. The values vary across the categories, with solar clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 051: School Attendance

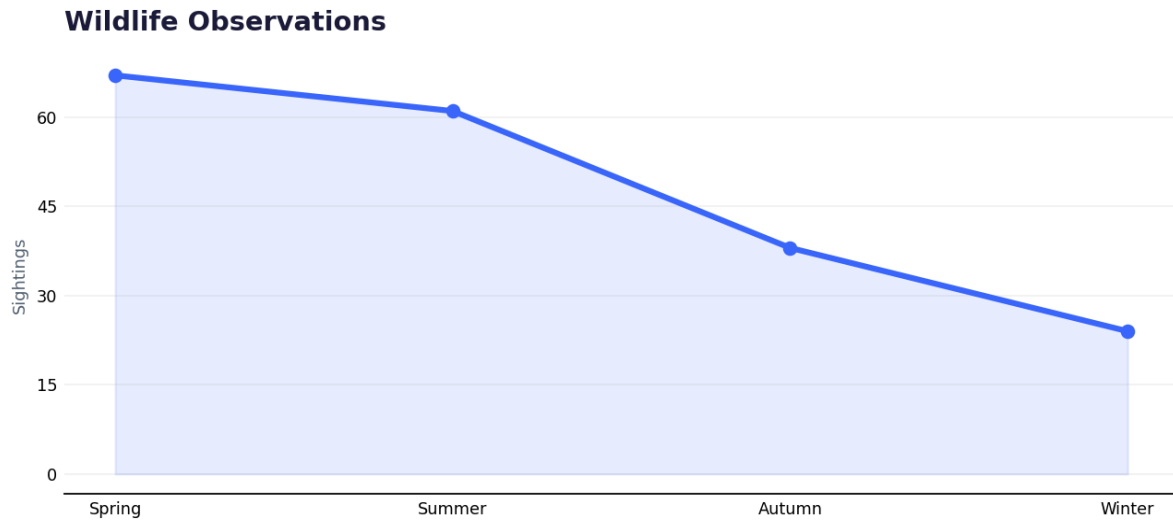

Sample response

The bar chart presents school attendance across 4 categories. The highest figure is 62 for Grade 6, while Grade 7 records the lowest value at 16. The values vary across the categories, with grade 6 clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 052: Wildlife Observations

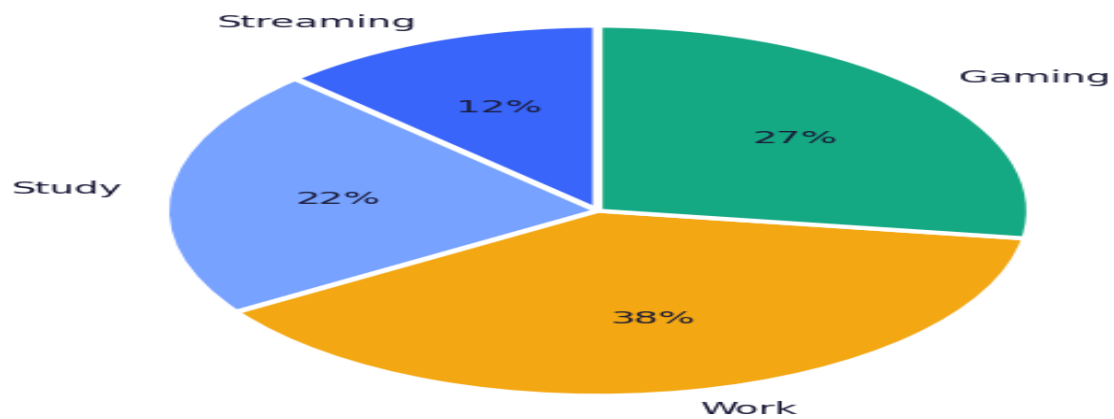

Sample response

The line chart presents wildlife observations across 4 categories. The highest figure is 67 for Spring, while Winter records the lowest value at 24. The values vary across the categories, with spring clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 053: Household Internet Use

Household Internet Use

Sample response

The pie chart compares household internet use. Work has the largest share at 28 percent, whereas Streaming is the smallest at 9 percent. The other categories fall between these values. Overall, the distribution is led by work.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 054: Public Transit Reliability

Public Transit Reliability

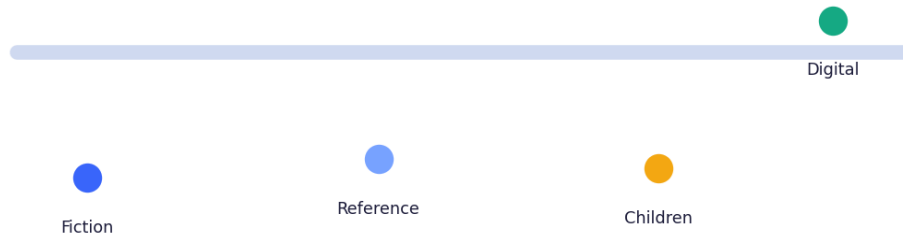

Sample response

The diagram shows 4 stages in public transit reliability. It begins with bus and proceeds through rail, tram, before ending with ferry. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 055: Library Collection

Library Collection

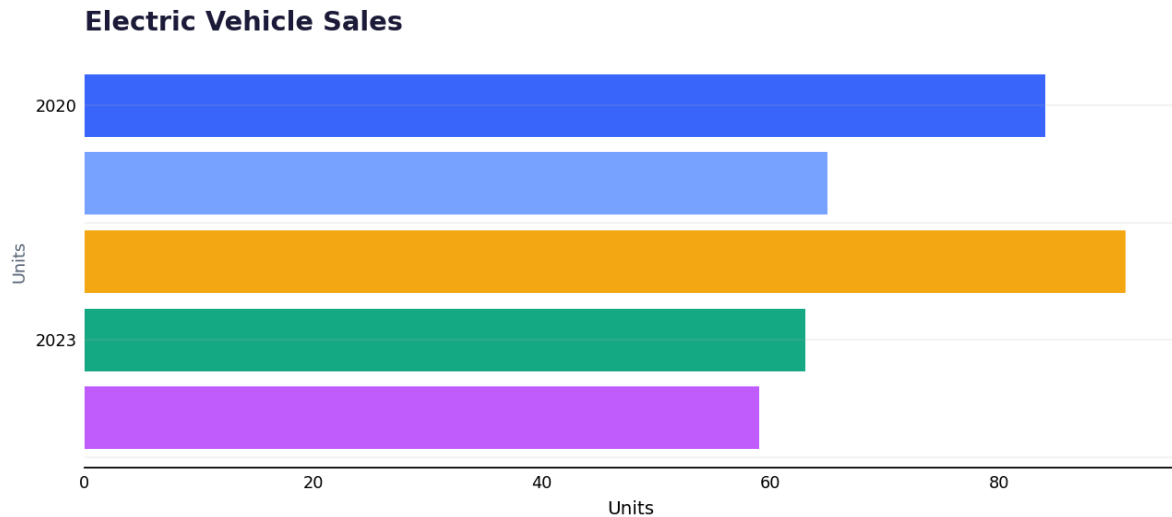

Sample response

The map presents the locations of 4 places in library collection. Fiction is in the main access area, while Digital is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 056: Electric Vehicle Sales

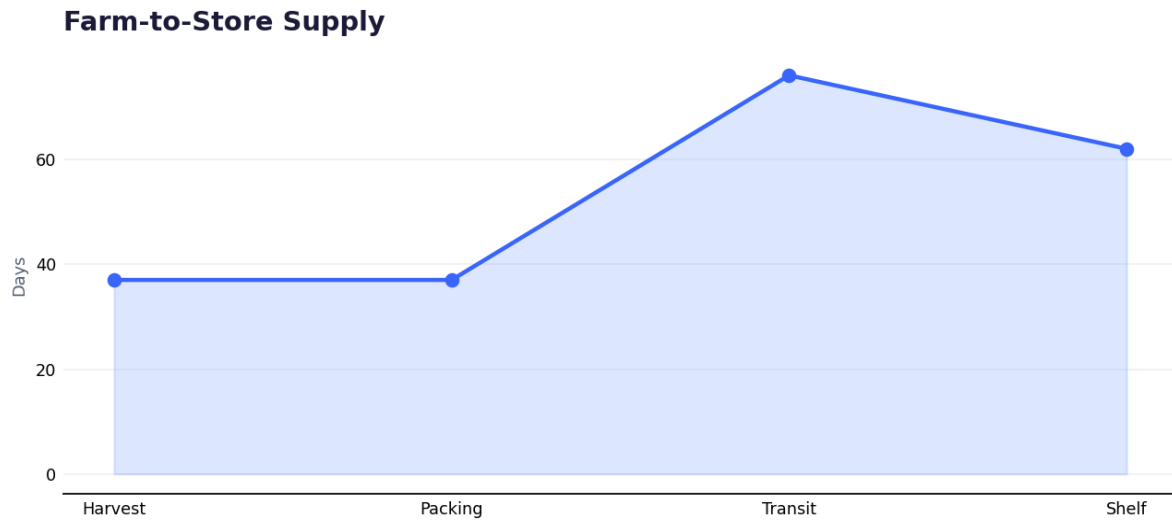

Sample response

The bar chart presents electric vehicle sales across 5 categories. The highest figure is 91 for 2022, while 2024 records the lowest value at 59. The values vary across the categories, with 2022 clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 057: Farm-to-Store Supply

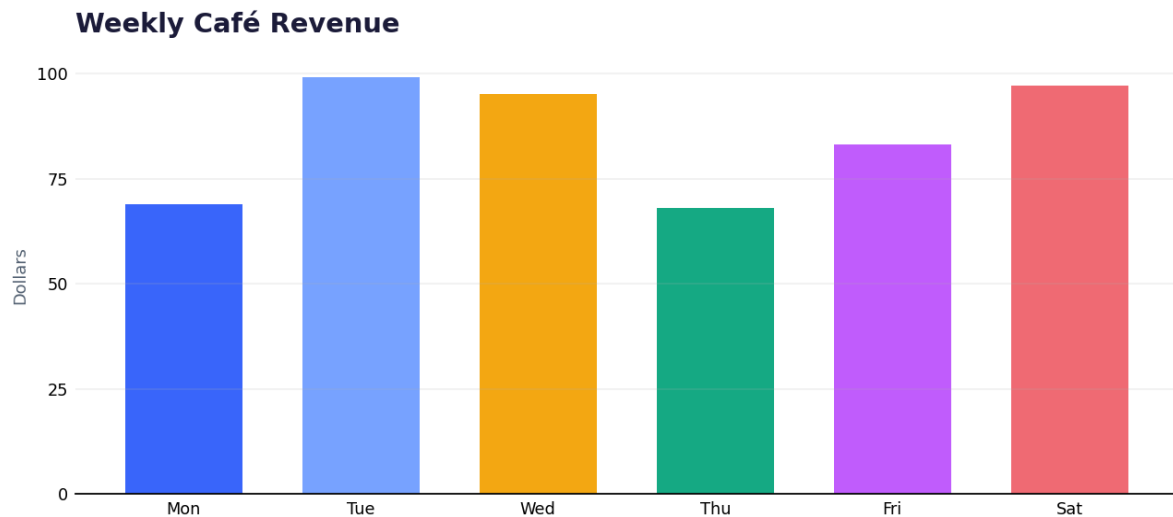

Sample response

The bar chart presents farm-to-store supply across 4 categories. The highest figure is 76 for Transit, while Harvest records the lowest value at 37. The values vary across the categories, with transit clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 058: Weekly Café Revenue

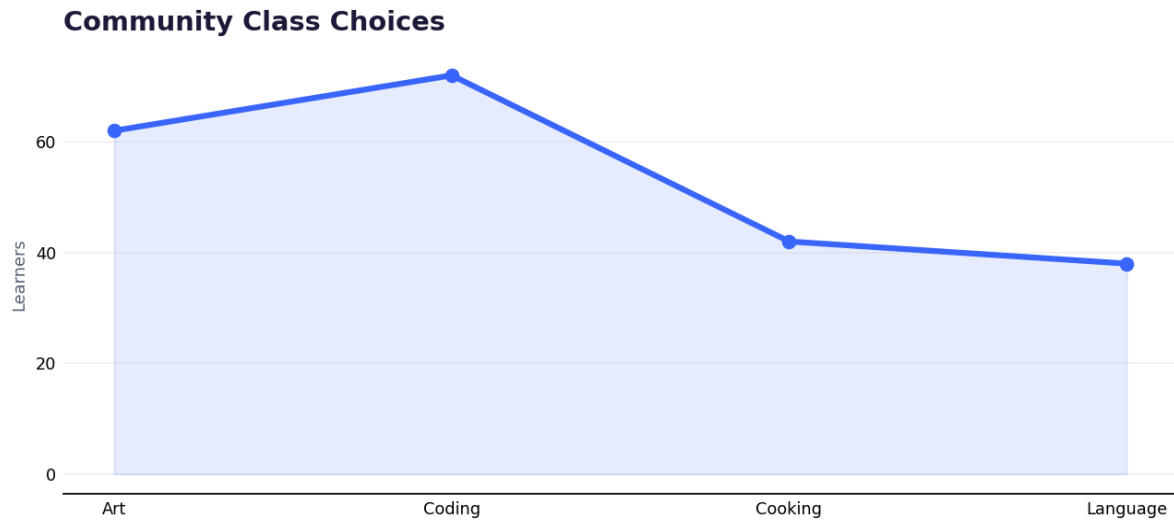

Sample response

The bar chart presents weekly café revenue across 6 categories. The highest figure is 99 for Tue, while Thu records the lowest value at 68. The values vary across the categories, with tue clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 059: Community Class Choices

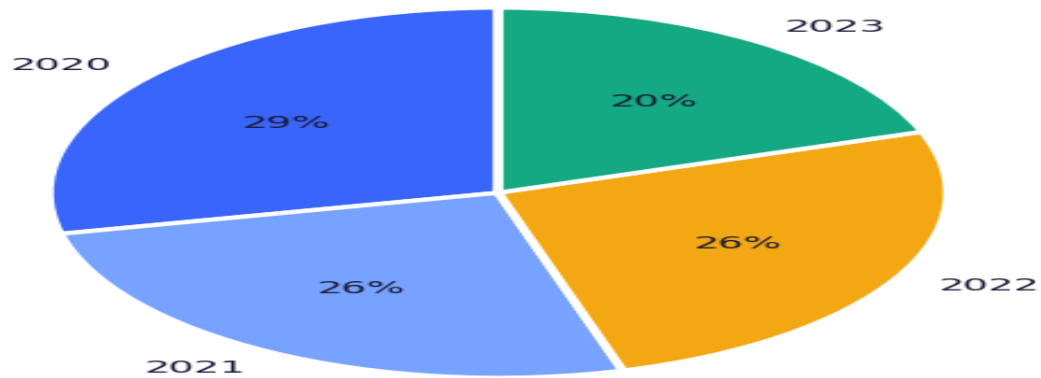

Sample response

The line chart presents community class choices across 4 categories. The highest figure is 72 for Coding, while Language records the lowest value at 38. The values vary across the categories, with coding clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 060: Reforestation Progress

Reforestation Progress

Sample response

The pie chart compares reforestation progress. 2020 has the largest share at 32 percent, whereas 2023 is the smallest at 22 percent. The other categories fall between these values. Overall, the distribution is led by 2020.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 061: Refrigerator Energy Use

Refrigerator Energy Use

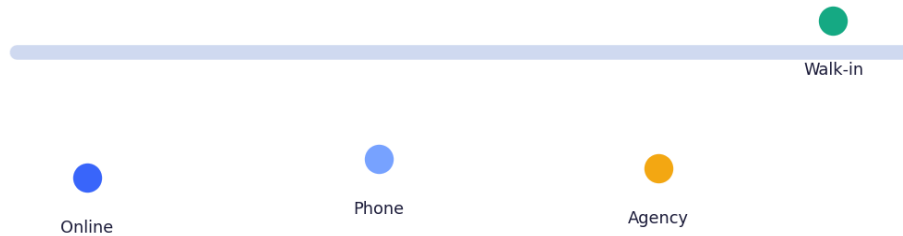

Sample response

The diagram shows 4 stages in refrigerator energy use. It begins with cooling and proceeds through freezing, lighting, before ending with standby. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 062: Travel Reservations

Travel Reservations

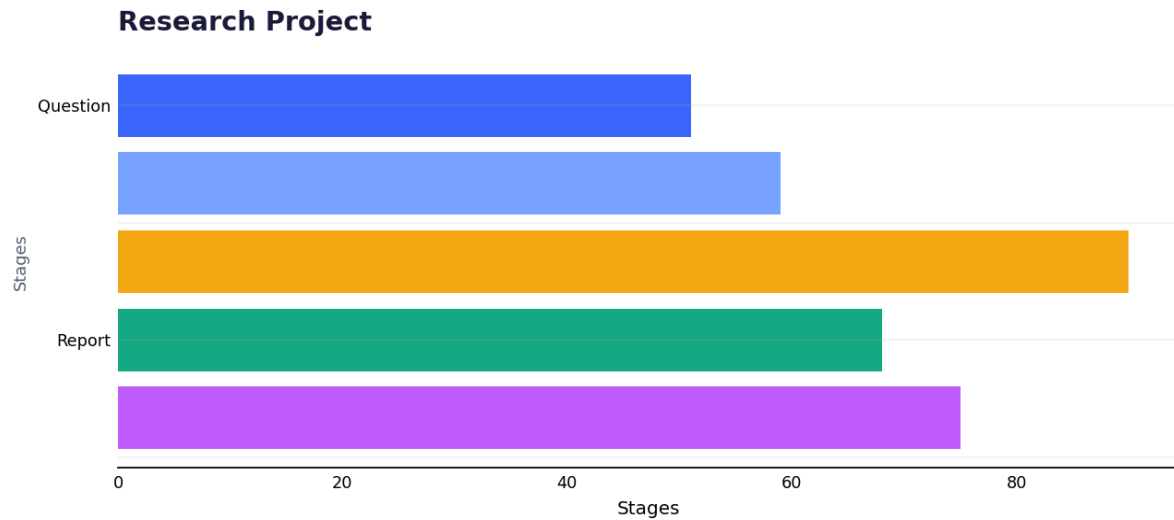

Sample response

The map presents the locations of 4 places in travel reservations. Online is in the main access area, while Walk-in is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 063: Research Project

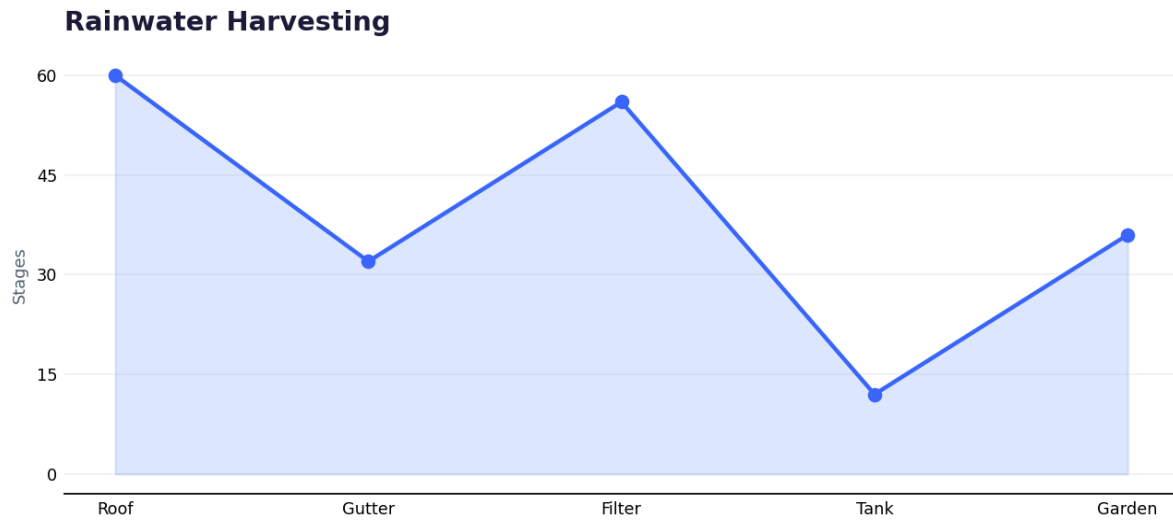

Sample response

The bar chart presents research project across 5 categories. The highest figure is 90 for Analysis, while Question records the lowest value at 51. The values vary across the categories, with analysis clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 064: Rainwater Harvesting

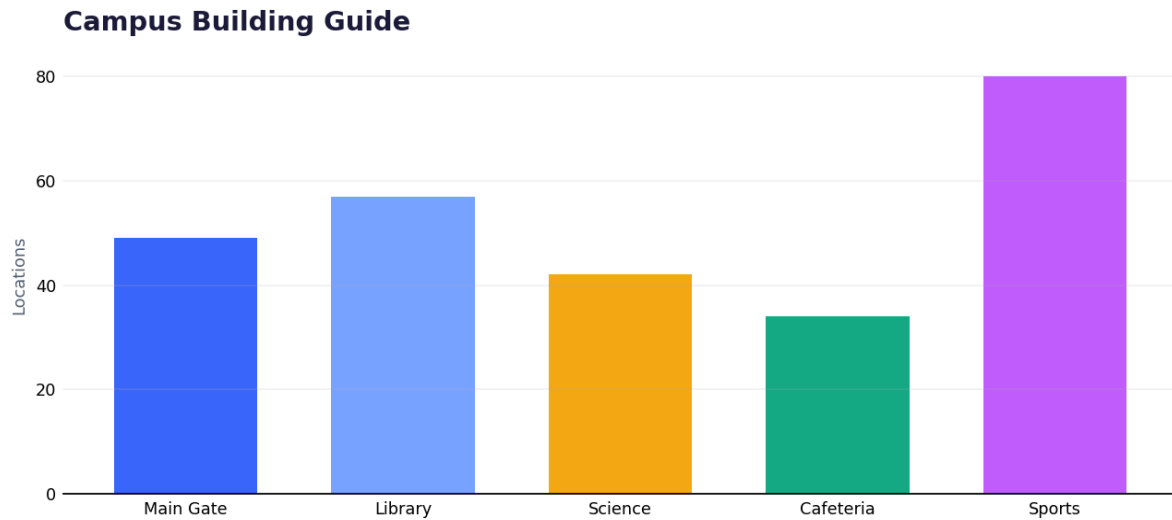

Sample response

The bar chart presents rainwater harvesting across 5 categories. The highest figure is 60 for Roof, while Tank records the lowest value at 12. The values vary across the categories, with roof clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 065: Campus Building Guide

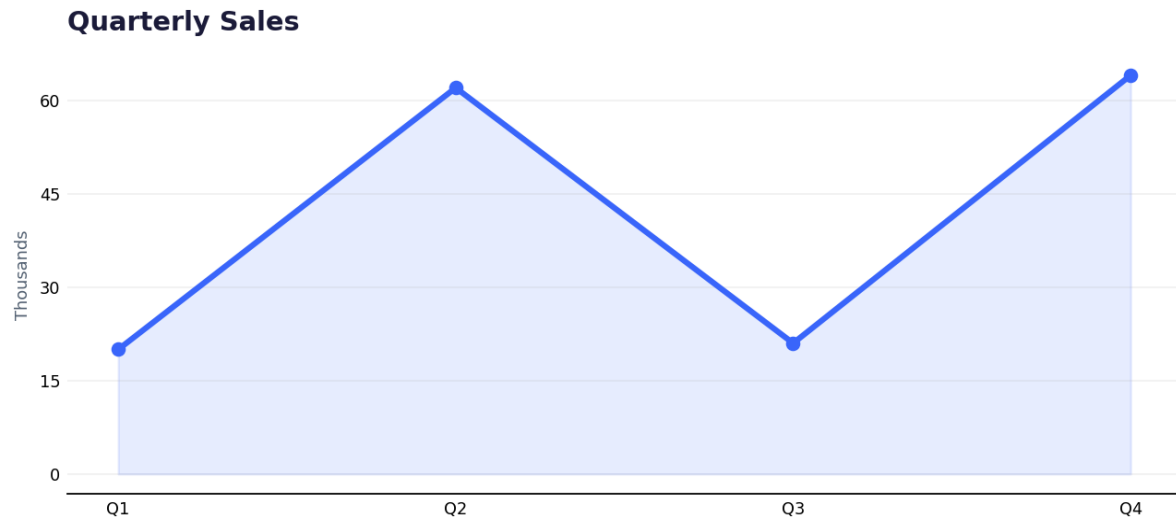

Sample response

The bar chart presents campus building guide across 5 categories. The highest figure is 80 for Sports, while Cafeteria records the lowest value at 34. The values vary across the categories, with sports clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 066: Quarterly Sales

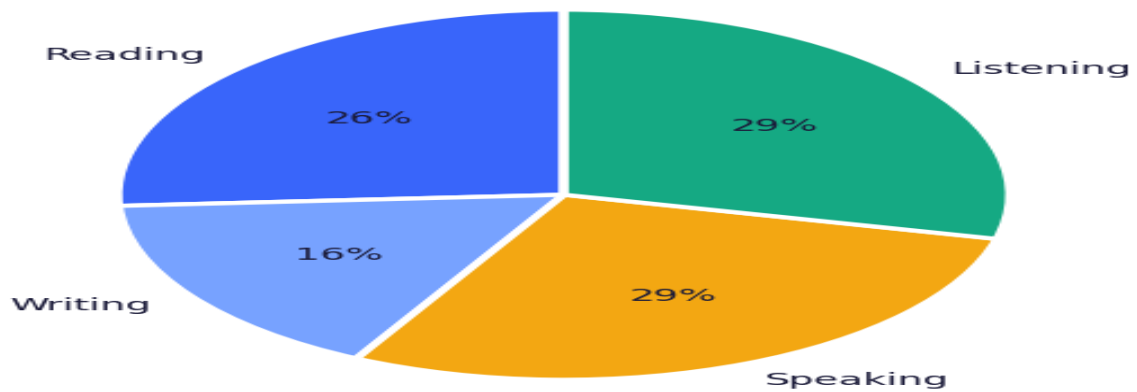

Sample response

The line chart presents quarterly sales across 4 categories. The highest figure is 64 for Q4, while Q1 records the lowest value at 20. The values vary across the categories, with q4 clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 067: Language Skills

Language Skills

Sample response

The pie chart compares language skills. Speaking has the largest share at 30 percent, whereas Writing is the smallest at 17 percent. The other categories fall between these values. Overall, the distribution is led by speaking.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 068: Meal Preferences

Meal Preferences

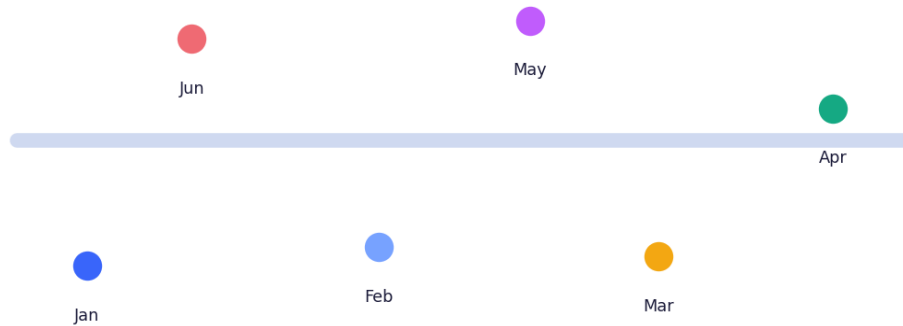

Sample response

The diagram shows 4 stages in meal preferences. It begins with breakfast and proceeds through lunch, dinner, before ending with snacks. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 069: Monthly Savings

Monthly Savings

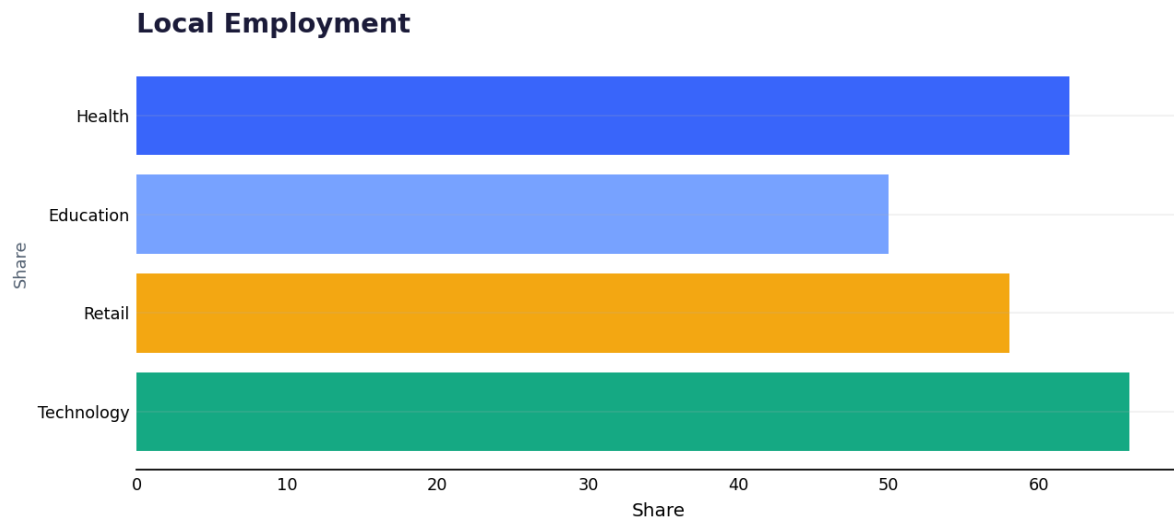

Sample response

The map presents the locations of 6 places in monthly savings. Jan is in the main access area, while Jun is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 070: Local Employment

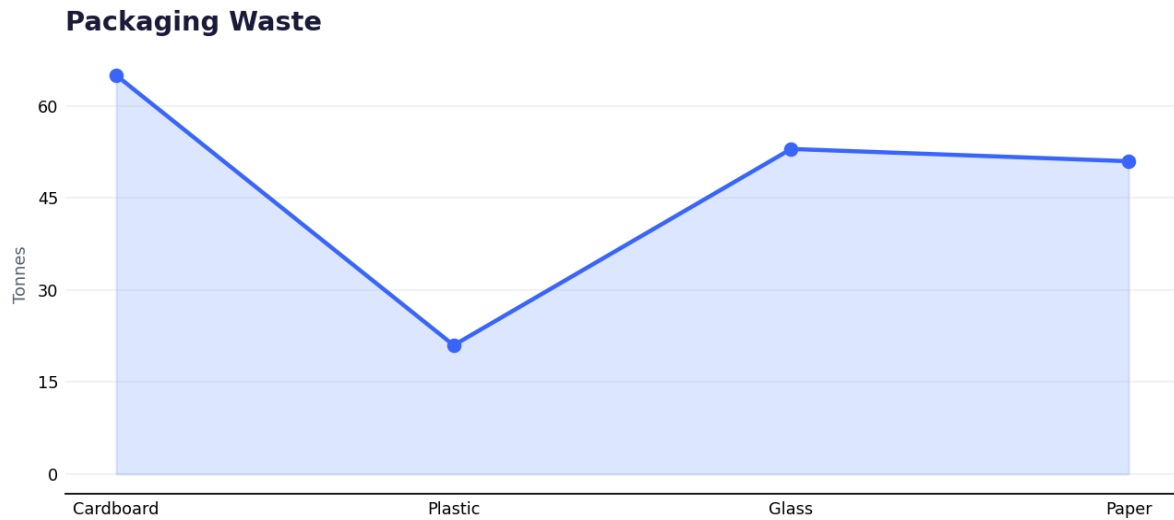

Sample response

The bar chart presents local employment across 4 categories. The highest figure is 66 for Technology, while Education records the lowest value at 50. The values vary across the categories, with technology clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 071: Packaging Waste

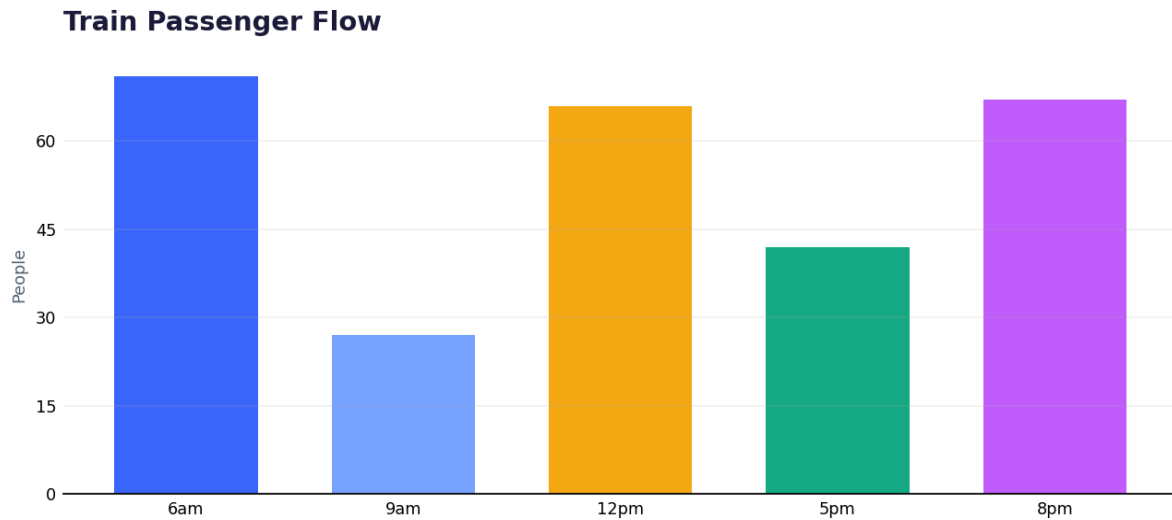

Sample response

The bar chart presents packaging waste across 4 categories. The highest figure is 65 for Cardboard, while Plastic records the lowest value at 21. The values vary across the categories, with cardboard clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 072: Train Passenger Flow

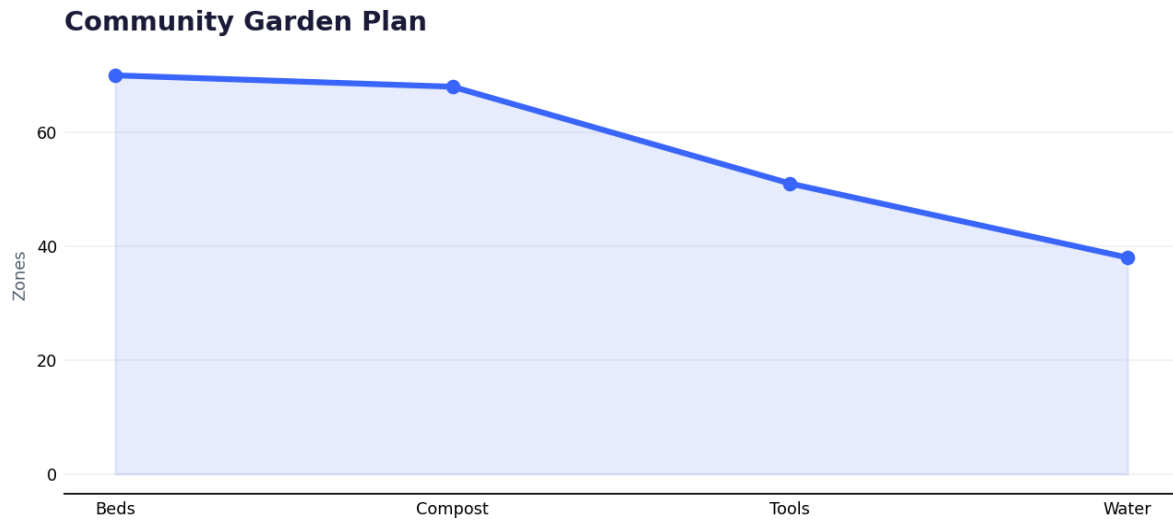

Sample response

The bar chart presents train passenger flow across 5 categories. The highest figure is 71 for 6am, while 9am records the lowest value at 27. The values vary across the categories, with 6am clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 073: Community Garden Plan

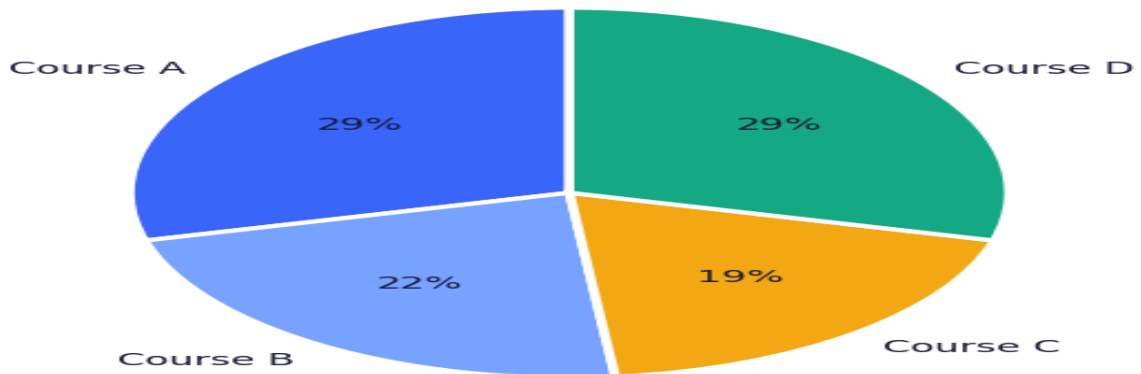

Sample response

The line chart presents community garden plan across 4 categories. The highest figure is 70 for Beds, while Water records the lowest value at 38. The values vary across the categories, with beds clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 074: Online Learning Completion

Online Learning Completion

Sample response

The pie chart compares online learning completion. Course A has the largest share at 35 percent, whereas Course C is the smallest at 23 percent. The other categories fall between these values. Overall, the distribution is led by course a.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 075: Energy Efficient Homes

Energy Efficient Homes

Sample response

The diagram shows 5 stages in energy efficient homes. It begins with 2019 and proceeds through 2020, 2021, 2022, before ending with 2023. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 076: Food Supply Chain

Food Supply Chain

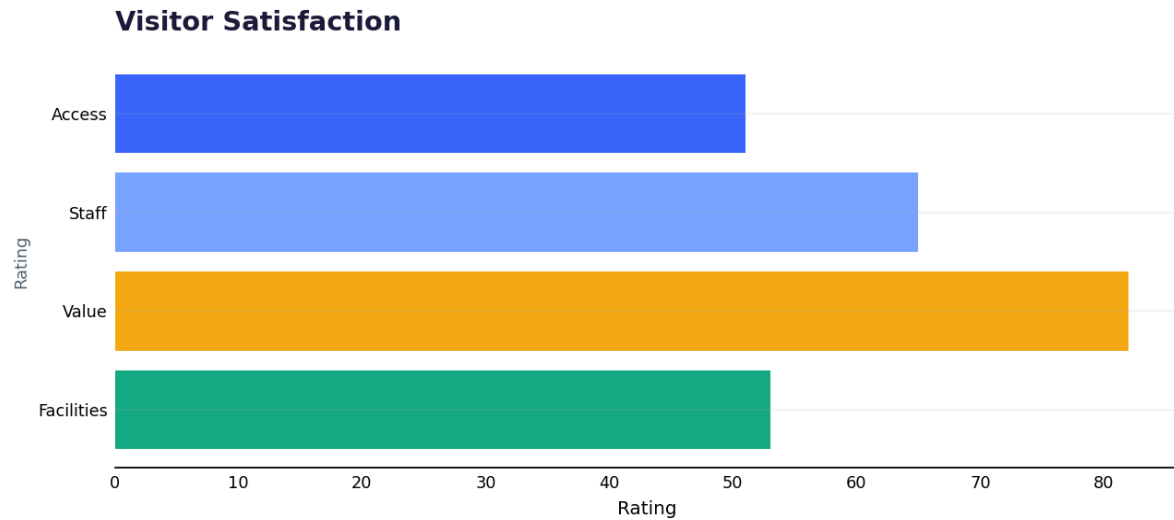

Sample response

The map presents the locations of 5 places in food supply chain. Grow is in the main access area, while Sell is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 077: Visitor Satisfaction

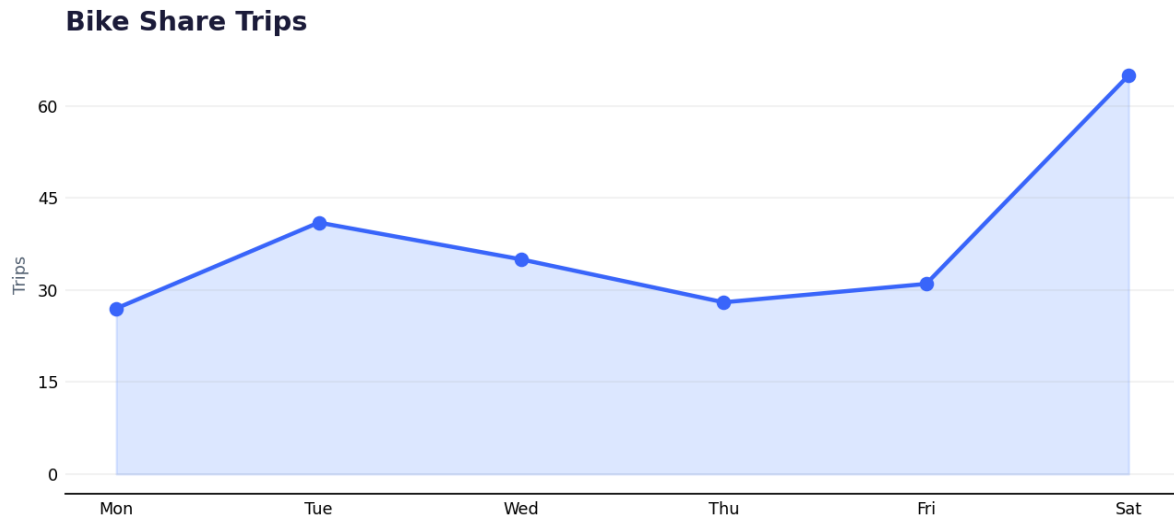

Sample response

The bar chart presents visitor satisfaction across 4 categories. The highest figure is 82 for Value, while Access records the lowest value at 51. The values vary across the categories, with value clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 078: Bike Share Trips

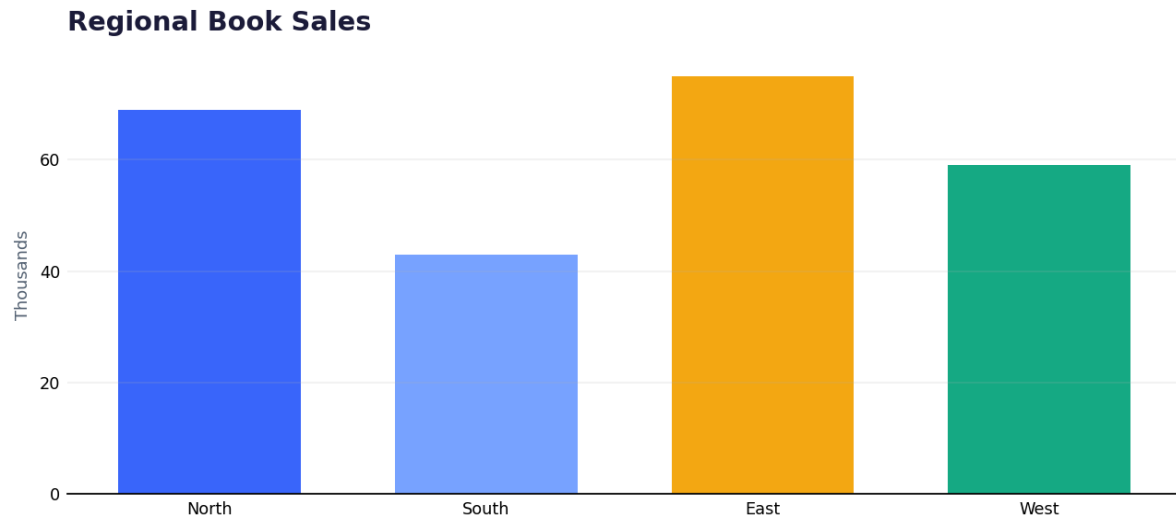

Sample response

The bar chart presents bike share trips across 6 categories. The highest figure is 65 for Sat, while Mon records the lowest value at 27. The values vary across the categories, with sat clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 079: Regional Book Sales

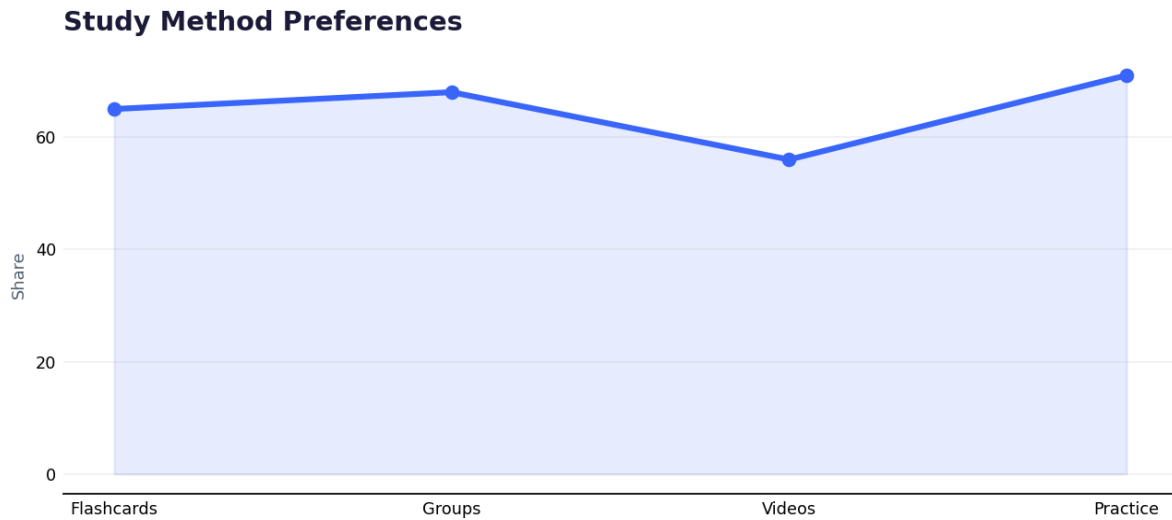

Sample response

The bar chart presents regional book sales across 4 categories. The highest figure is 75 for East, while South records the lowest value at 43. The values vary across the categories, with east clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 080: Study Method Preferences

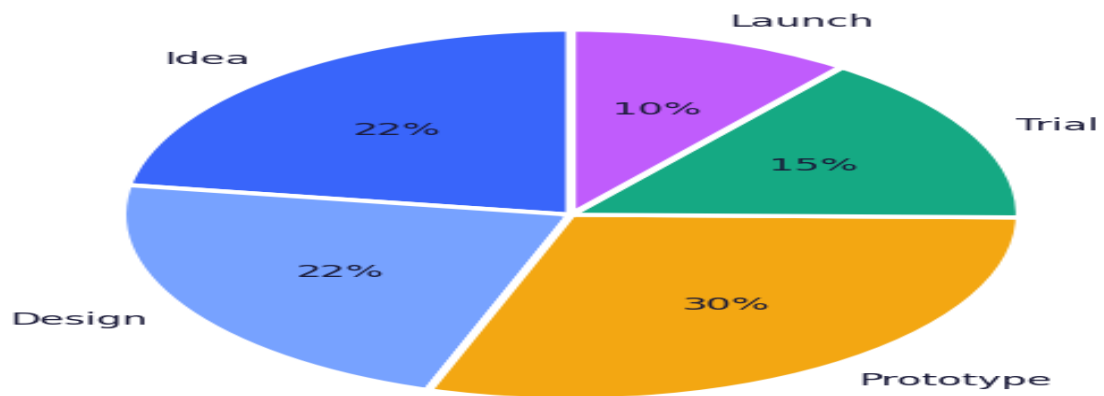

Sample response

The line chart presents study method preferences across 4 categories. The highest figure is 71 for Practice, while Videos records the lowest value at 56. The values vary across the categories, with practice clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 081: New Product Development

New Product Development

Sample response

The pie chart compares new product development. Prototype has the largest share at 32 percent, whereas Launch is the smallest at 11 percent. The other categories fall between these values. Overall, the distribution is led by prototype.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 082: Noise Levels by Area

Noise Levels by Area

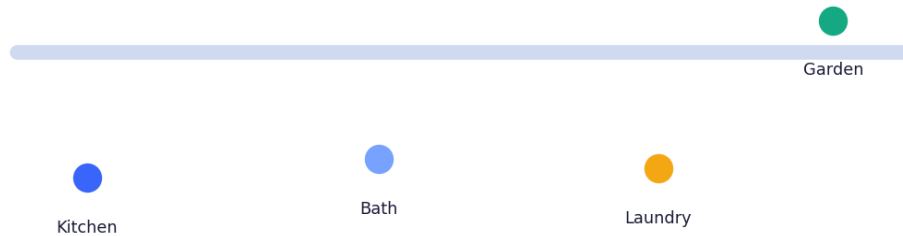

Sample response

The diagram shows 4 stages in noise levels by area. It begins with center and proceeds through park, school, before ending with road. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 083: Water Consumption

Water Consumption

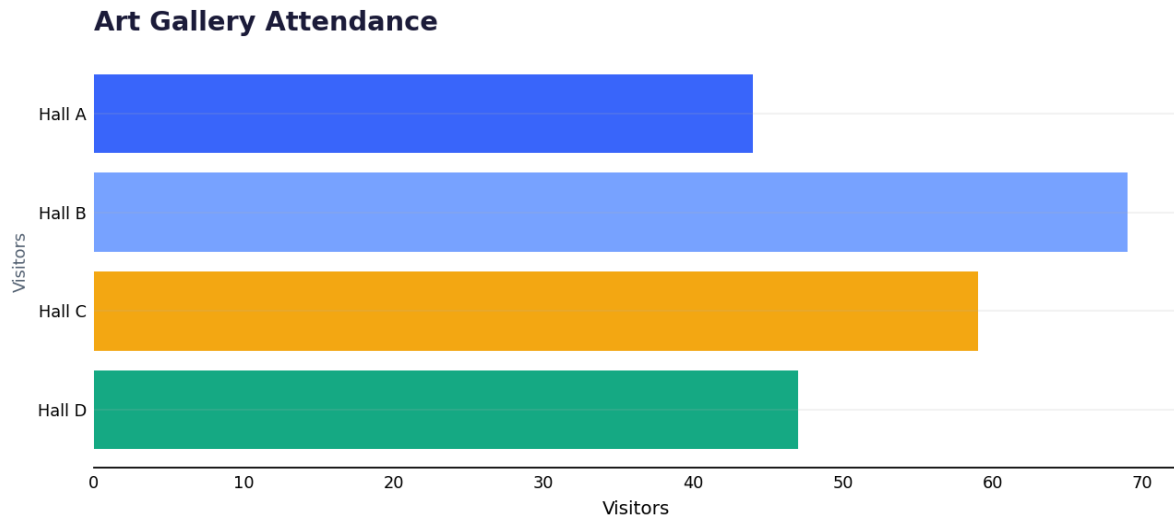

Sample response

The map presents the locations of 4 places in water consumption. Kitchen is in the main access area, while Garden is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 084: Art Gallery Attendance

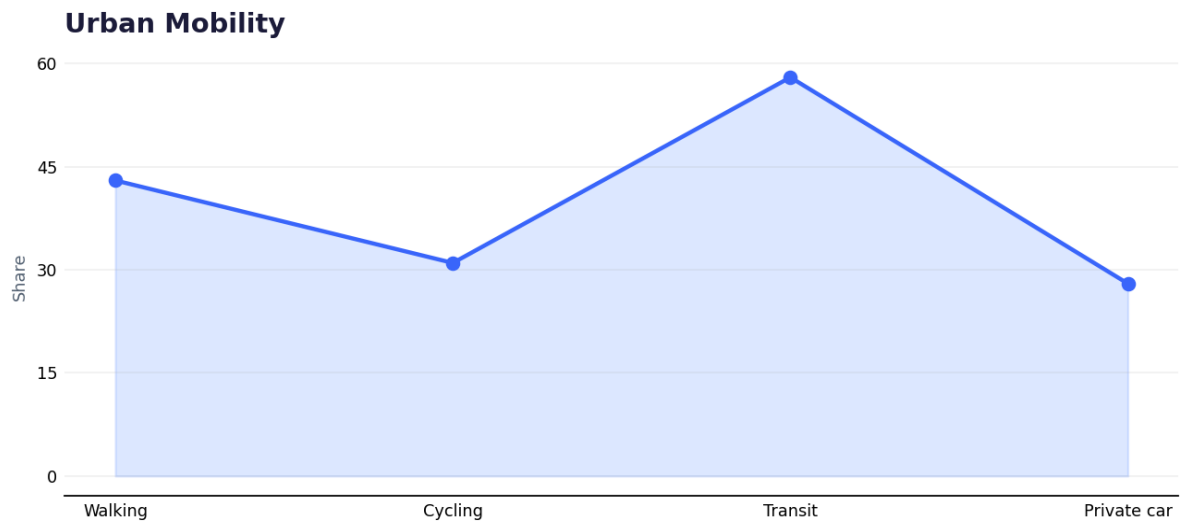

Sample response

The bar chart presents art gallery attendance across 4 categories. The highest figure is 69 for Hall B, while Hall A records the lowest value at 44. The values vary across the categories, with hall b clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 085: Urban Mobility

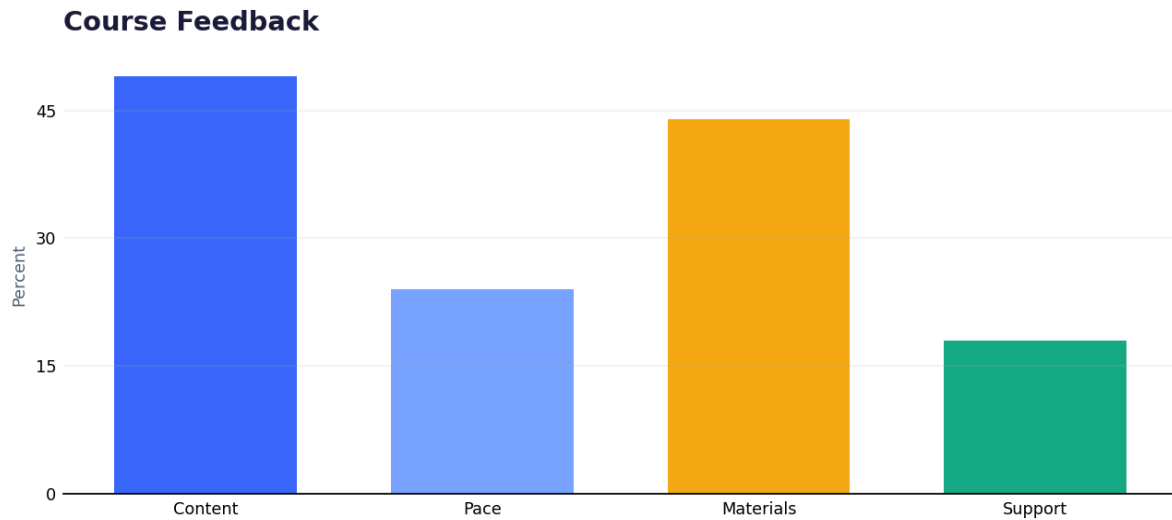

Sample response

The bar chart presents urban mobility across 4 categories. The highest figure is 58 for Transit, while Private car records the lowest value at 28. The values vary across the categories, with transit clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 086: Course Feedback

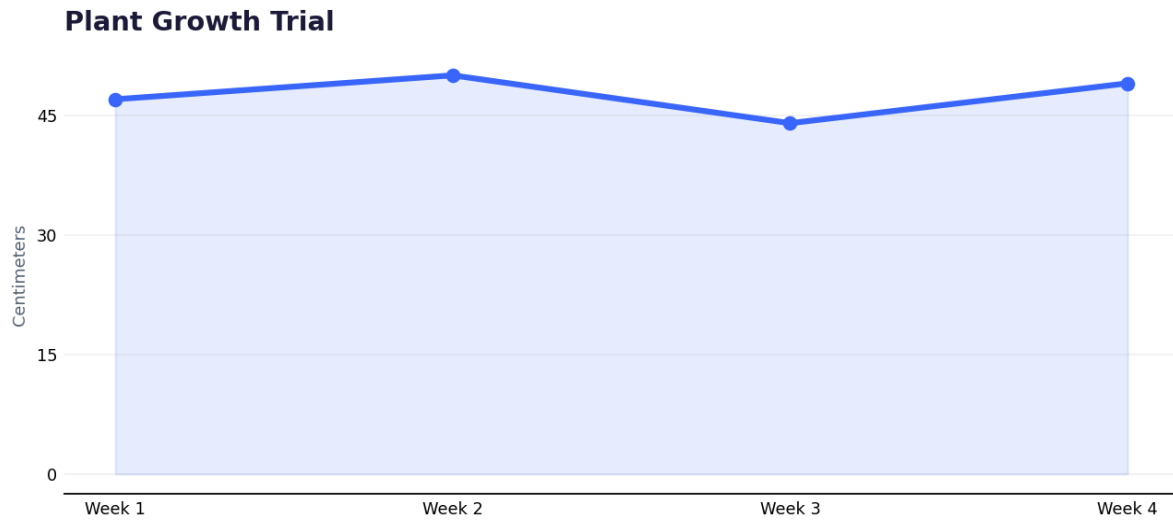

Sample response

The bar chart presents course feedback across 4 categories. The highest figure is 49 for Content, while Support records the lowest value at 18. The values vary across the categories, with content clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 087: Plant Growth Trial

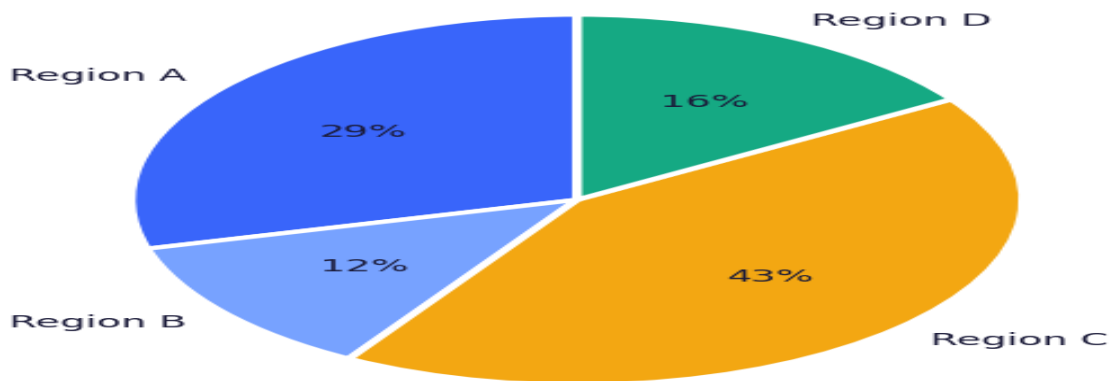

Sample response

The line chart presents plant growth trial across 4 categories. The highest figure is 50 for Week 2, while Week 3 records the lowest value at 44. The values vary across the categories, with week 2 clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 088: Global Coffee Imports

Global Coffee Imports

Sample response

The pie chart compares global coffee imports. Region C has the largest share at 35 percent, whereas Region B is the smallest at 10 percent. The other categories fall between these values. Overall, the distribution is led by region c.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 089: Digital Payment Use

Digital Payment Use

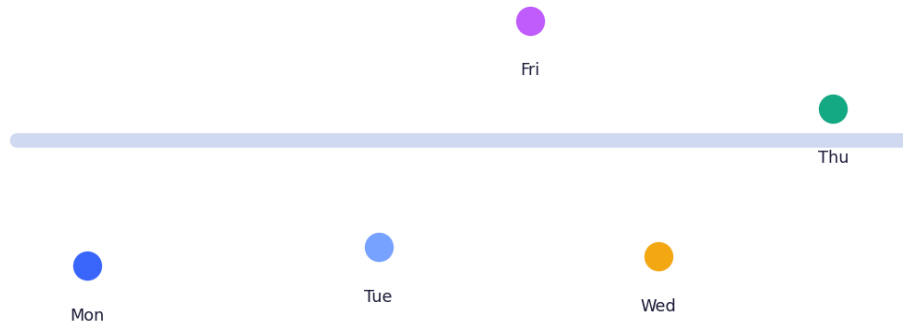

Sample response

The diagram shows 4 stages in digital payment use. It begins with card and proceeds through mobile, cash, before ending with online. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 090: School Library Visits

School Library Visits

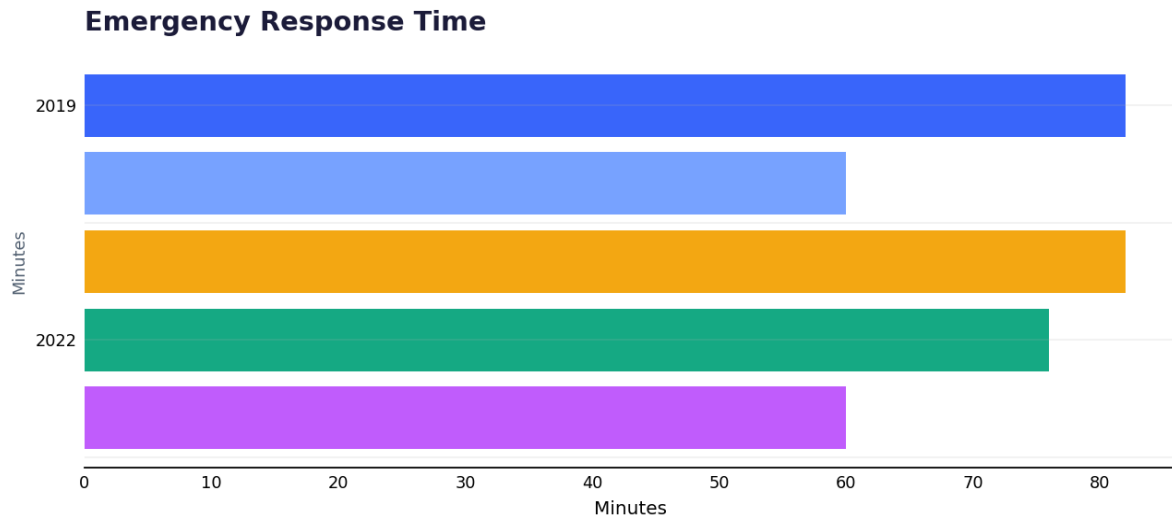

Sample response

The map presents the locations of 5 places in school library visits. Mon is in the main access area, while Fri is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 091: Emergency Response Time

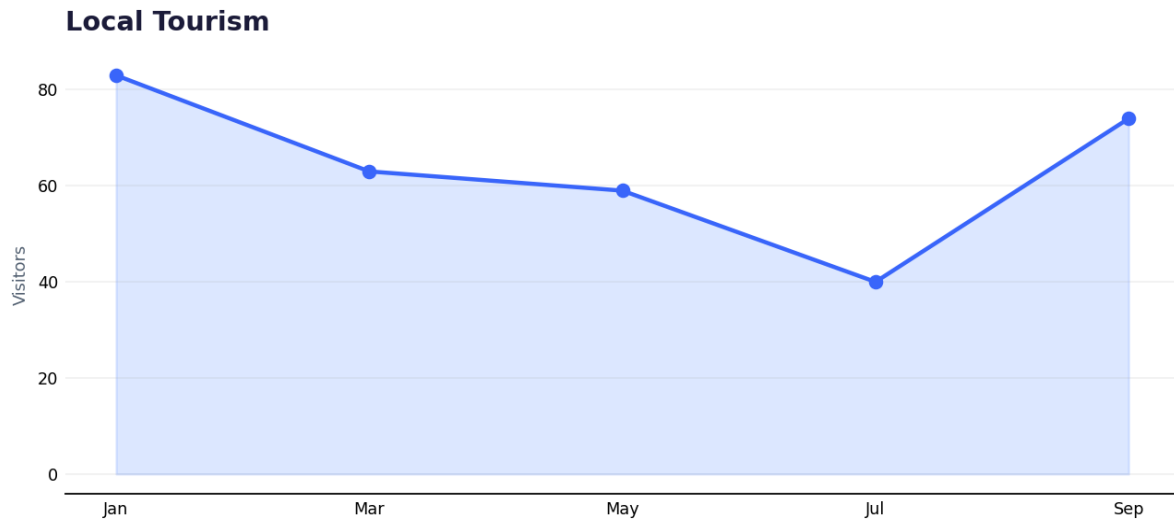

Sample response

The bar chart presents emergency response time across 5 categories. The highest figure is 82 for 2019, while 2020 records the lowest value at 60. The values vary across the categories, with 2019 clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 092: Local Tourism

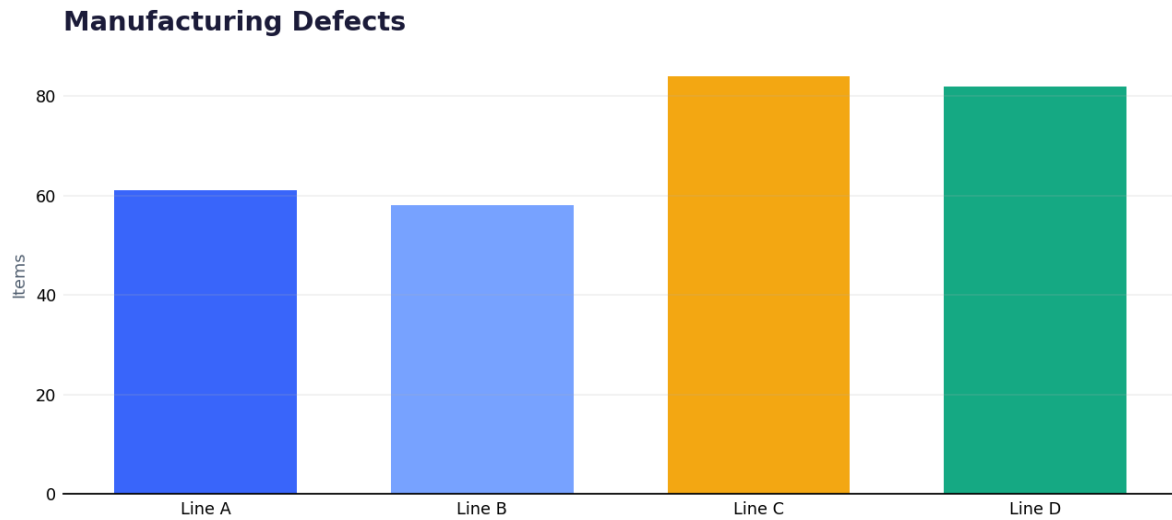

Sample response

The bar chart presents local tourism across 5 categories. The highest figure is 83 for Jan, while Jul records the lowest value at 40. The values vary across the categories, with Jan clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 093: Manufacturing Defects

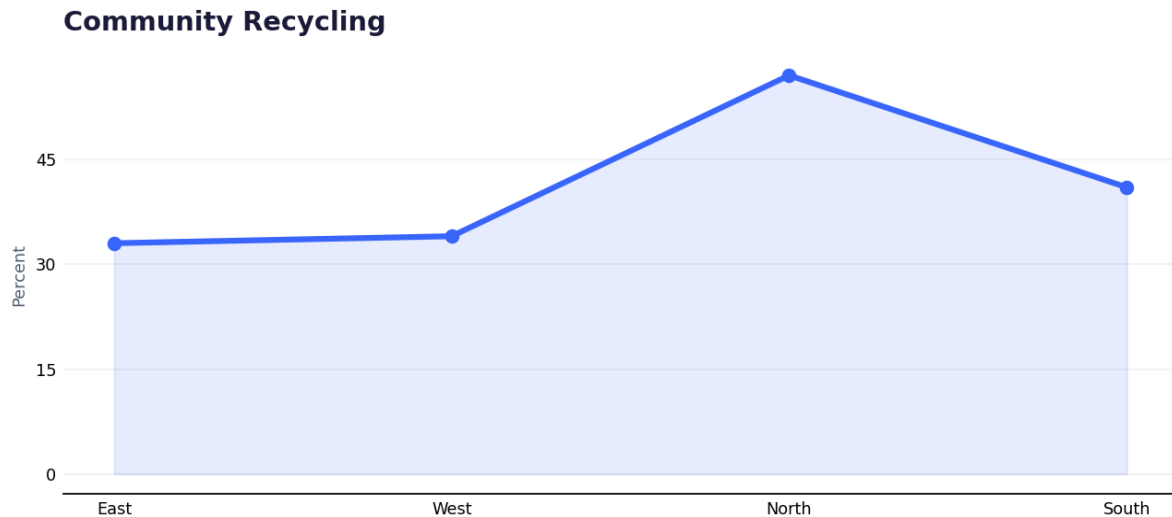

Sample response

The bar chart presents manufacturing defects across 4 categories. The highest figure is 84 for Line C, while Line B records the lowest value at 58. The values vary across the categories, with line c clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 094: Community Recycling

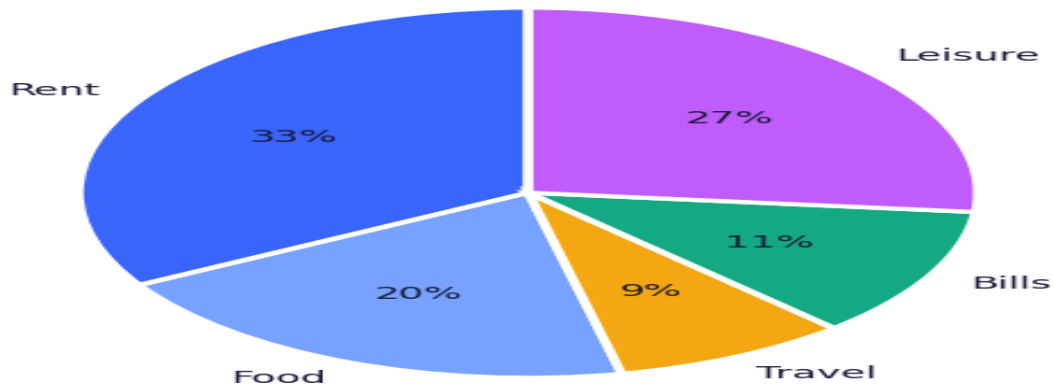

Sample response

The line chart presents community recycling across 4 categories. The highest figure is 57 for North, while East records the lowest value at 33. The values vary across the categories, with north clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 095: Personal Budget

Personal Budget

Sample response

The pie chart compares personal budget. Rent has the largest share at 35 percent, whereas Travel is the smallest at 9 percent. The other categories fall between these values. Overall, the distribution is led by rent.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 096: Greenhouse Process

Greenhouse Process

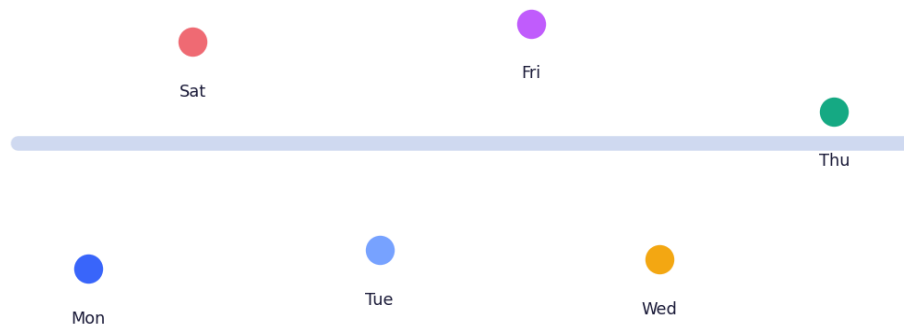

Sample response

The diagram shows 5 stages in greenhouse process. It begins with seed and proceeds through plant, pollinate, harvest, before ending with pack. Overall, the sequence moves step by step from the initial stage to the final outcome.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 097: Language App Sessions

Language App Sessions

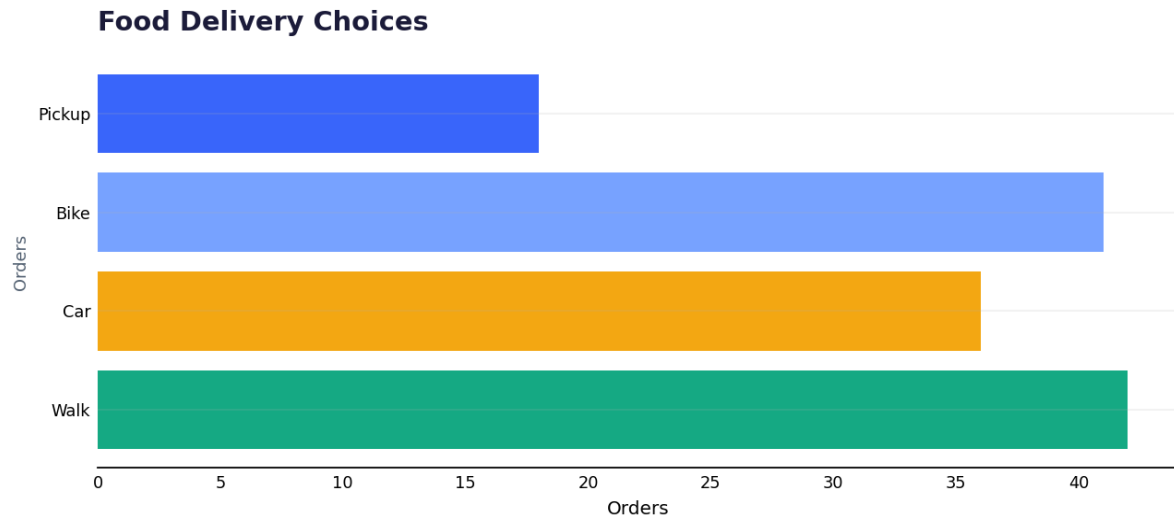

Sample response

The map presents the locations of 6 places in language app sessions. Mon is in the main access area, while Sat is positioned at another edge of the site. The remaining facilities are distributed between them. Overall, the layout connects the key locations through a central area.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 098: Food Delivery Choices

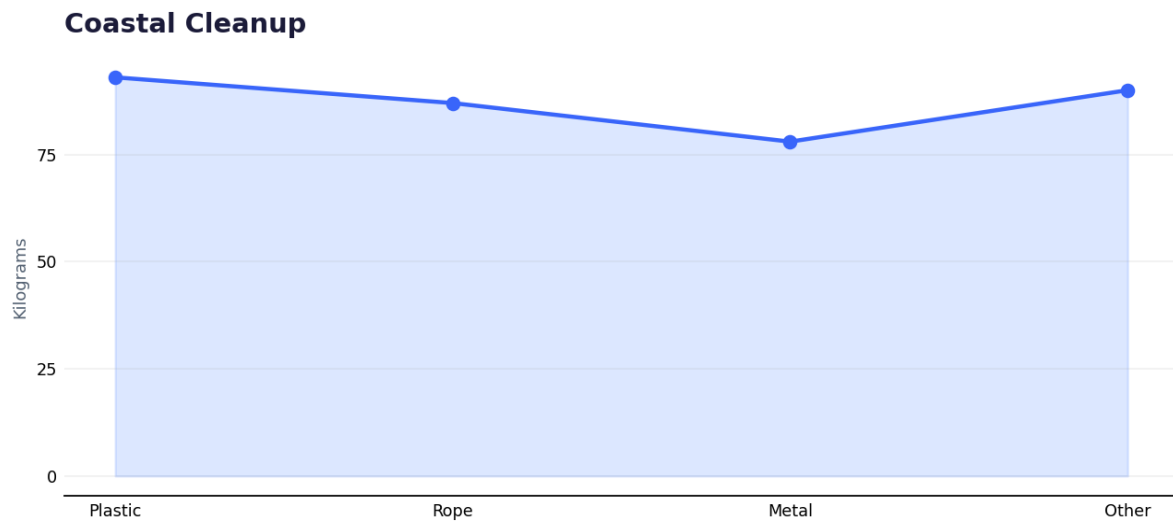

Sample response

The bar chart presents food delivery choices across 4 categories. The highest figure is 42 for Walk, while Pickup records the lowest value at 18. The values vary across the categories, with walk clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 099: Coastal Cleanup

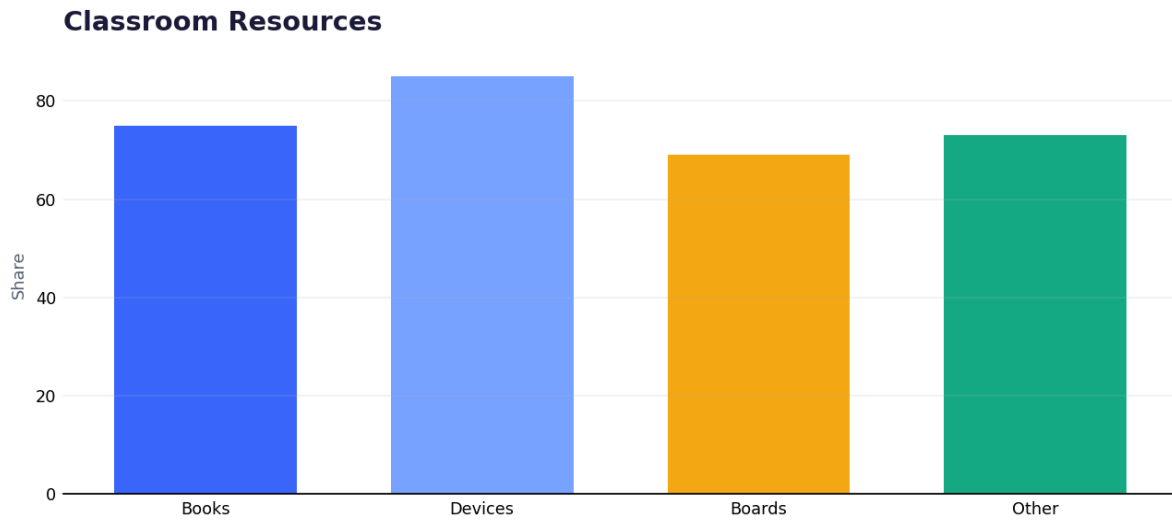

Sample response

The bar chart presents coastal cleanup across 4 categories. The highest figure is 93 for Plastic, while Metal records the lowest value at 78. The values vary across the categories, with plastic clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.

Answer 100: Classroom Resources

Sample response

The bar chart presents classroom resources across 4 categories. The highest figure is 85 for Devices, while Boards records the lowest value at 69. The values vary across the categories, with devices clearly leading. Overall, the chart shows a notable difference between the highest and lowest groups.

Speaking tip: Mention the biggest feature first, then support it with one or two precise details.
