# How this book works

*A short guide before you start*

**Ranked by frequency.** Words are listed from the most common to the least common. The small amber number beside each word is its rank, so word 00001 is the single most common word in the list.

**Every entry has three parts:** the word with its main part of speech, a short plain-English meaning, and an example sentence that shows the word in use.

**Twenty levels of 1,000 words.** Each level opens with a navy divider page. Use the bookmarks in your PDF reader to jump straight to any level.

**Common words come first, so start there.** Knowing the first 2,000 words is enough to follow most everyday conversations. Words in the later levels are rarer, more specialised, and mostly found in reading.

**One main meaning per word.** Many English words have several meanings. This book gives the one you are most likely to meet. Always check the sentence around a word, because context decides the meaning.

**Word list.** Word ranking is based on the open *wordfreq* project by Robyn Speer, which combines text from books, news, subtitles, social media and the web. Inflected forms (for example plurals and past tenses) are folded into their base word, so the list counts dictionary words, not word forms.

**Meanings.** Most definitions come from WordNet, edited for length. WordNet is © 2006 by Princeton University. All rights reserved. WordNet is provided by Princeton University “as is”, and Princeton makes no representations or warranties, express or implied. Full licence: wordnet.princeton.edu/license-and-commercial-use. Some definitions were rewritten by TypoGrammar for clarity.

**Examples.** Example sentences are either taken from WordNet or written by TypoGrammar.com.

**A note on accuracy.** Each entry gives one main meaning. If you find a mistake or a better example, please let us know at typogrammar.com so we can improve the next edition.
